READING PASSAGE 1

The Importance of Children's Play

Brick by brick, six-year-old Alice is building a magical

kingdom. Imagining **fairy-tale turrets** and **fire-breathing** dragons, **wicked** witches and **gallant** heroes, she's creating an **enchancing** world. Although she isn't aware of it, this fantasy is helping her **take her first steps** towards her capacity for creativity and so it will have important **repercussions** in her adult life.

Minutes later, Alice has **abandoned** the kingdom **in favour of** playing schools with her younger brother. When she **bosses him around** as his 'teacher', she's practising how to regulate her emotions through **pretence**. Later on, when they tire of this and **settle down** with a board game, she's learning about the need to follow rules and **take turns** with a partner.

'Play in all its rich variety is one of the highest achievements of the human species,' says Dr David Whitebread from the Faculty of Education at the University of Cambridge, UK. 'It

brick by brick= steadily in a step-by-step manner, the creation or destruction of smt. 'brɪk 'baɪ brɪk
fairy-tale= enchanted, magical, fabulous 'feəri:teɪl
turret= a small tower on a large building, especially a castle. 'tʌrɪt

fire-breathing= able to produce a stream of fire from the mouth 'faɪə, brɪ:ðɪŋ

wicked= evil, unkind, sadistic, cruel, #good 'wɪkɪd

gallant= kind, polite, respectful, gracious, #rude, #cowardly ɡə'lənt

enchancing= attractive, pleasant delightful, interesting, compelling ɪn'tʃɑ:nɪŋ

take the first step= begin, start new things 'teɪk ðə 'fɜ:st step

repercussion= consequence, effect, impact, outcome ('kʌs= shake i.e discussion, concussion) rɪ:pə'kʌʃn

abandon=, leave behind, give up, walk out on #stay with. ə'bændən

in favour of= preferring to choose someone or something that you believe is better ɪn 'feɪvər ɒv

boss someone around= give orders, order around, command, bully #obey 'bɒs 'sʌmwʌn ə'raʊnd

pretence= pretense, make-believe, imagination, #reality prɪ'tens

settle down= to relax, doing a quiet activity 'setl daʊn

take turn (take it in turns)= alternate 'teɪk 'tʌ:n

underpins how we develop as **intellectual**, problem-solving adults and is crucial to our success as a highly **adaptable** species.'

Recognising the importance of play is not new: over two **millennia** ago, the Greek philosopher Plato **extolled** its **virtues** as a means of developing skills for adult life, and ideas about play-based learning have been developing since the 19th century.

But we live in changing times, and Whitebread is **mindful of** a worldwide decline in play, **pointing out** that over half the people in the world now live in cities. 'The opportunities for free play, which I experienced almost every day of my childhood, are becoming increasingly **scarce**,' he says. Outdoor play is **curtailed** by **perceptions** of risk to do with traffic, as well as parents' increased wish to protect their children from being the victims of crime, and by the **emphasis** on 'earlier is better' which is leading to greater competition in academic learning and schools.

International bodies like the United Nations and the European Union have begun to develop policies concerned with children's right to play, and to consider **implications** for **leisure facilities** and educational programmes. But what they often lack is the evidence to base policies on. 'The type of play we are interested in is **child-initiated**, **spontaneous** and unpredictable- but, as soon as you ask a five-year-old "to play", then you as the researcher have **intervened**,' explains Dr Sara Baker. 'And we want to know what the long-term impact of play is. It's a real challenge.'

Dr Jenny Gibson agrees, pointing out that although some of the steps in the **puzzle** of how and why play is important have been looked at, there is very little data on the impact it has on the child's later life.

Now, thanks to the university's new Centre for Research on Play in Education, Development and Learning (PEDAL), Whitebread, Baker, Gibson and a team of researchers hope to provide evidence on the role played by play in how a child develops.

'A strong **possibility** is that play supports the early development of children's **self-control**,' explains Baker. 'This is our ability to develop awareness of our own thinking processes - it influences how effectively we go about **undertaking** challenging activities.'

In a study carried out by Baker with **toddlers** and young **pre-schoolers**, she found that children with greater self-control solved problems more quickly when exploring an unfamiliar

underpin= support, reinforce, strengthen, #weaken
 ʌndəˈpɪn
intellectual= philosopher, thinker, scholar (*lect*= read i.e. *prelect*, *lecture*) ɪntəˈlektʃʊəl
adaptable= adjustable, easygoing, flexible, #inflexible əˈdæptəbəl
millennia (plural) - millennium (singular)= 1000 years (*millen*= thousand each i.e. *millionaire*, *millenary*) miˈlenɪə - miˈlenɪəm
extol= praise, admire, exalt, #deprecate ɪkˈstəʊl
virtue= goodness, integrity, morality, #wickedness (vir= man i.e. *virtual*, *virtuality*) ˈvɜːtʃuː

mindful of= aware, attentive #unaware #inattentive
 ˈmaɪndfəl ɒv
point out= indicate, show, reveal, #hide point ˈaʊt
scarce= rare, uncommon, limited, in short supply, #plentiful, #abundant skeəs
curtail= restrain, limit, restrict, reduce kɜːˈteɪl
perception= insight, view, opinion (per=thoroughly i.e. *perfection*, *persistence*) pəˈsepʃən
emphasis= stress, importance, highlighting ˈemfəsɪs

implication= effect, inference, association, knock-on effect (plic= fold i.e. *complicate*, *application*) ɪmˈpliˈkeɪʃən
leisure= free time, entertainment, relaxation ˈleɪʒə
facilities= buildings, services, equipment, etc. that are provided for a particular purpose (fac=do, make i.e. *factory*, *facilitate*) feˈsɪlɪtɪz
child-initiated play= play in which children choose what and how to play and who to play with tʃaɪld-ɪˈnɪʃɪeɪtɪd pleɪ
spontaneous= unplanned, natural, impulsive, #planned sponˈteɪniəs
intervene= , , interrupt, get involved become involved in a situation in order to improve or help it (ven= come i.e. *invent*, *advent*) ɪntəˈviːn

puzzle= mystery, enigma, riddle, #explanation ˈpʌzl

possibility= option, probability, likelihood, prospect poʊˈbɪlɪti
self-control= self-discipline, willpower, ability to remain calm and not show your emotions even though you are feeling angry, excited, etc. self kənˈtrəʊl
undertake= carry out, embark on, take on, #relinquish ʌndəˈteɪk

toddler= baby, a child who has only recently learnt to walk ˈtɒdlə
pre-schooler= a child who does not yet go to school, or who goes to preschool priˌskuːlə

set-up requiring scientific reasoning. 'This sort of evidence makes us think that giving children the chance to play will make them more successful **problem-solvers** in the long run.'

If **playful** experiences do **facilitate** this aspect of development, say the researchers, it could be extremely significant for educational practices, because the ability to **self-regulate** has been shown to be a key **predictor** of academic performance. Gibson adds: 'Playful behaviour is also an important **indicator** of healthy social and emotional development. In my previous research, I **investigated** how **observing** children at play can give us important clues about their **well-being** and can even be useful in the **diagnosis** of **neurodevelopmental disorders** like **autism**.'

Whitebread's recent research has involved developing a play-based **approach** to supporting children's writing. 'Many primary school children find writing difficult, but we showed in a previous study that a playful **stimulus** was far more effective than an instructional one.'

Children wrote longer and better-structured stories when they first played with dolls representing characters in the story. In the latest study, children first created their story with Lego*, with similar results. 'Many teachers commented that they had always previously had children saying they didn't know what to write about. With the Lego building, however, not a single child said this through the whole year of the project.'

Whitebread, who directs PEDAL, trained as a primary school teacher in the early 1970s, when, as he describes, 'the teaching of young children was largely a quiet **backwater**, **untroubled** by any serious intellectual **debate** or

set-up= arrangement, system, situation, circumstance 'set ʌp
problem-solver= those who are good at finding ways of dealing with problems 'prɒbləm solvə(r)
(*solv*=loosen, set free i.e. **dissolve**, **solution**)

playful= lively, frisky, full of fun, full of life, #subdued 'pleɪfəl
facilitate= enable, aid, help, assist, smooth the progress of, #impede (*fac*=do, make i.e. **factory**, **facility**) fə'sɪlɪteɪt
self-regulate= self-control, self-discipline, self-will (*regul*=rule i.e. **regular**, **regulation**) self 'reg.jə.leɪt
predictor= something that can show what will happen in the future (*dic/dict*= proclaim, say i.e. **dictation**, **verdict**) prɪ'dɪktə
indicator= pointer, display, sign (*dic/dict*= proclaim, say i.e. **dictation**, **verdict**) 'ɪndɪkeɪtə
investigate= examine, explore, inspect, check. (*vestig*= track i.e. **vestigial**) ɪn'vestɪgeɪt
observe= watch, view, monitor, study, #ignore (*serv*= save, protect i.e. **conserve**, **reserve**) əb'zɜ:v
well-being= comfort, happiness, welfare wel 'bi:ɪŋ
diagnosis= analysis, discover or identify the exact cause of an illness or a problem (*gno*= know i.e. **telegnosis**, **agnosia**) daɪəg'nəʊsɪs
neurodevelopmental disorders= a group of disorders in which the development of the central nervous system is disturbed (*neur*= nerve i.e. **neurologic**, **neural**) 'njuərəʊdɪ'veləp'ment(ə)l dɪs'ɔ:dəz
autism= a mental condition in which a person finds it very difficult to communicate or form relationships with others (*aut*=self i.e. **automatic**, **authentic**) 'ɔ:t,ɪzəm

approach= method, tactic, methodology ə'prəʊtʃ

stimulus= incentive, motivation, incitement, encouragement ('stimul= rouse i.e. **stimulate**) 'stɪmjʊləs

backwater= remote place, the middle of nowhere, backwoods, sticks 'bæk,wɔ:tə

untroubled= peaceful, calm, tranquil, undisturbed #bothered #troubled ən'traʊblɪd

debate= argument, discuss, dispute dɪ'beɪt

controversy. ' Now, the **landscape** is very different, with **hotly** debated topics such as school starting age.

'Somehow the importance of play has been lost in recent decades. It's regarded as something **trivial**, or even as something negative that **contrasts** with "work". Let's not lose sight of its benefits, and the **fundamental** contributions it makes to human achievements in the arts, sciences and technology. Let's make sure children have a rich diet of play experiences.'

*Lego: coloured plastic building blocks and other pieces that can be joined together

controversy= disagreement, discussion, debate, #agreement (**vers**=turn i.e **convert**, **adverse**) 'kɒntɹəvɜːsi
landscape= environment, situation, background 'lændskeɪp
hotly= fiercely, angrily, strongly, passionately, #dispassionately 'hɒtli

trivial=minor, unimportant, insignificant, #crucial 'trɪvɪəl

contrast= differ, conflict, be different from something (**contra**= against i.e **contraception**, **contradict**) kən'trɑːst

fundamental= basic, essential, central, important (**fund** = bottom i.e **foundation**, **profound**) fʌndə'mentl

READING PASSAGE 2

The Growth of Bike-Sharing Schemes Around The World

How Dutch engineer Luud Schimmelpennink helped to **devise** urban bike-sharing **schemes**

A.

The original idea for an urban bike-sharing scheme dates back to a summer's day in Amsterdam in 1965. Provo, the organisation that **came up with** the idea, was a group of Dutch **activists** who wanted to change society. They believed the scheme, which was known as the Witte Fietsenplan, was an answer to the **perceived threats** of air pollution and **consumerism**. In the centre of Amsterdam, they painted a small number of used bikes white. They also distributed **leaflets** describing the dangers of cars and inviting people to use the white bikes. The bikes were then left unlocked at various locations around the city, to be used by anyone in need of transport.

B.

Luud Schimmelpennink, a Dutch industrial engineer who still lives and cycles in Amsterdam, was heavily involved in the original scheme. He **recalls** how the scheme succeeded in

devise= invent, create, plan, conceive *dr'vaɪz*
scheme= program, plan, system, strategy
(schem = plan i.e schema, schematic) ski:m

come up with= think of, create, produce *'kʌm*

activist= protester, advocate, campaigner
(act= do i.e action, actor, agent) 'æktɪvɪst
perceive= understand, notice, recognize,
distinguish, become aware of, #ignore
(per=thoroughly i.e perfection, persistence) pə'si:v
threat = risk, danger, trouble *θret*
consumerism = the belief that it is good to
buy and use a lot of goods and services –
often used to show disapproval *(sum=take i.e*
assume, subsume) kən'sju:məɪzəm
leaflet = flyer, pamphlet, brochure, booklet,
handout (piece of paper advertising) *'li:flɪt*

recall= remember, remind, elicit, bring to
mind, #forget *rɪ'kɔ:l*

attracting a **great deal** of attention - particularly when it came to publicising Provo's aims - but **struggled** to **get off the ground**. The police **were opposed to** Provo's **initiatives** and almost as soon as the white bikes were **distributed** around the city, they removed them. However, for Schimmelpennink and for bike-sharing schemes in general, this was just the beginning. 'The first Witte Fietsenplan was just a **symbolic** thing,' he says. 'We painted a few bikes white, that was all. Things got more serious when I became a member of the Amsterdam city council two years later.'

C.

Schimmelpennink **seized** this opportunity to present a more **elaborate** Witte Fietsen plan to the city council. 'My idea was that the **municipality** of Amsterdam would distribute 10,000 white bikes over the city, for everyone to use,' he explains. 'I made serious calculations. It **turned out** that a white bicycle - per person, per kilometre - would cost the municipality only 10% of what it contributed to public transport per person per kilometre.' Nevertheless, the council **unanimously** rejected the plan. 'They said that the bicycle belongs to the past. They saw a **glorious** future for the car,' says Schimmelpennink. But he was not in the least **discouraged**.

D.

Schimmelpennink never stopped believing in bike-sharing, and in the mid-90s, two Danes asked for his help to set up a system in Copenhagen. The result was the world's first large-scale bike-share programme. It worked on a **deposit**: 'You dropped a coin in the bike and when you returned it, you got your money back.' After setting up the Danish system, Schimmelpennink decided to try his luck again in the Netherlands - and this time he succeeded in **arousing** the interest of the Dutch Ministry of Transport. 'Times had changed,' he recalls. 'People had become more environmentally **conscious**, and the Danish experiment had **proved** that bike-sharing was a real possibility.' A new Witte Fietsenplan was launched in 1999 in Amsterdam. However, riding a white bike was no longer free; it cost one **guilder** per trip and payment was made with a **chip** card developed by the Dutch bank Postbank. Schimmelpennink designed **conspicuous, sturdy** white bikes locked in special **racks** which could be opened with the chip card - the plan started with 250 bikes, **distributed** over five stations.

a great deal= enormous, a large amount, significant, #a little, #a few əˈɡreɪt di:l
struggle= to try very hard to do something when it is difficult ˈstrʌɡl
get off the ground (phrase)= start to be successful get ɒf ðə ɡraʊnd
be opposed to= disagree with, against, object to (op/ob=against i.e offend, oblique) bi əˈpəʊzd tuː
initiative= proposal, scheme, idea, project ɪˈnɪʃetɪv
distribute= give out, allocate, spread dɪˈstrɪbjʊːt
symbolic= figurative, representative, emblematic sɪmˈbɒlɪk

seize= grab, get hold of, capture, take, #lose siːz
elaborate= complicated, complex, detailed, carefully prepared and organized ɪˈlæbəreɪt
municipality= city, borough, town, metropolis mjuːnɪsɪˈpælɪti
turn out= come out, result, become, end up ˈtɜːn aʊt
unanimously= all together, consistently, totally, #partly juːˈnænɪməsli
glorious= magnificent, wonderful, superb, #inglorious (glori=glory i.e glorify, vainglory) ˈɡlɔːriəs
discourage= demoralized, deter, less confident #encourage dɪsˈkʌrɪdʒ

deposit= a sum of money that is paid by somebody when they rent something and that is returned to them if they do not lose or damage the thing they are renting. (posit= put i.e position, apposite) dɪˈpɒzɪt
arouse= stimulate, provoke, awaken, stir up, encourage, inspire əˈraʊz
conscious= aware, mindful, deliberate, #unaware, #unconscious ˈkɒnʃəs
prove= show, demonstrate, verify #disprove pruːv
guilder= the standard unit of money used in the Netherlands before the Euro ˈɡɪldə
chip= microchip = a very small piece of silicon containing a set of electronic parts, which is used in computers and other machines tʃɪp
conspicuous= visible, clear, noticeable, obvious, #inconspicuous (spic= look i.e aspect, prospect, respect) kənˈspɪkjʊəs
sturdy= robust, durable, strong, well-made, heavy-duty #weak ˈstɜːdi
rack= frame, framework, holder ræk
distribute= deliver, spread, spread out. dɪˈstrɪbjʊːt

E.

Theo Molenaar, who was a system designer for the project, worked alongside Schimmelpennink. 'I remember when we were testing the bike racks, he **announced** that he had already designed better ones. But of course, we had to go through with the ones we had.' The system, however, was **prone to vandalism** and **theft**. 'After every weekend there would always be a couple of bikes missing,' Molenaar says. 'I really have no idea what people did with them, because they could instantly be recognised as white bikes.' But the biggest **blow** came when Postbank decided to **abolish** the chip card, because it wasn't **profitable**. 'That chip card was **pivotal** to the system,' Molenaar says. 'To continue the project we would have needed to set up another system, but the business partner had lost interest.'

F.

Schimmelpennink was disappointed, but- **characteristically**- not for long. In 2002 he got a call from the French advertising **corporation** JC Decaux, who wanted to set up his bike-sharing scheme in Vienna. 'That went really well. After Vienna, they set up a system in Lyon. Then in 2007, Paris followed. That was a **decisive** moment in the history of bike-sharing.' The huge and unexpected success of the Parisian bike-sharing programme, which now **boasts** more than 20,000 bicycles, inspired cities all over the world to set up their own schemes, all modelled on Schimmelpennink's. 'It's wonderful that this happened,' he says. 'But financially I didn't really benefit from it, because I never **filed for a patent**.'

G.

In Amsterdam today, 38% of all trips are made by bike and, **along with** Copenhagen, it is **regarded as** one of the two most cycle-friendly capitals in the world - but the city never got another Witte Fietsenplan. Molenaar believes this may be because everybody in Amsterdam already has a bike. Schimmelpennink, however, cannot see that this changes Amsterdam's need for a bike-sharing scheme. 'People who travel on the underground don't carry their bikes around. But often they need additional transport to reach their final destination.' Although he thinks it is strange that a city like Amsterdam does not have a successful bike-sharing scheme, he is **optimistic** about the future. 'In the '60s we didn't **stand a chance** because people were prepared to give their lives to keep cars in the city. But that **mentality** has totally changed. Today everybody **longs for** cities that are not. Maybe it's time we changed our **outlook**.'

announce= publicize, inform, tell, publish, #keep secret ə'naʊns
prone to= suffer from, vulnerable to, susceptible, liable to, at risk prəʊn tu:
vandalism=the crime of destroying or damaging something, especially public property (van= empty i.e **vain**, **vanish**) 'vændəlɪzəm
theft= robbery, stealing θeft
blow= negative impact, set-back, shock, misfortune bləʊ
abolish= eliminate, stop, end, put an end to, #establish ə'bɒlɪʃ

outlook= viewpoint, point of view, attitude, position 'aʊtlʊk

READING PASSAGE 3

Motivational Factors And The Hospitality Industry

A critical ingredient in the success of hotels is developing and maintaining superior performance from their employees. How is that accomplished? What Human Resource Management (HRM) practices should organizations invest in to acquire and retain judicious great employees?

Some hotels aim to provide superior working conditions for their employees. The idea originated from workplaces - usually in the non-service sector - that emphasized fun and enjoyment as part of work-life balance. By contrast, the service sector, and more specifically hotels, has traditionally not extended these practices to address basic employee needs, such as good working conditions.

Pfeffer (1994) emphasizes that in order to succeed in a global business environment, organizations must make investment in Human Resource Management (HRM) to allow them to acquire employees who possess better skills and capabilities than their competitors. This investment will be to their

hospitality= welcome, friendly, kindness, warmth, #unfriendliness. (*hospit*= host i.e *hospice*, *hospital*)
 hosprɪˈtælɪti
critical= crucial, significant, vital, important (*crit*= judge i.e *criterion*, *apocrine*) ˈkrɪtɪkəl
superior= excellent, high-class, top-quality, first-class (*super*= above i.e *superb*, *supernova*) suːˈpiəriə
performance= presentation, show, enactment
 pəˈfɔːməns
accomplish= achieve, done, finish. əˈkʌmplɪʃ
acquire= obtain, gain, attain, achieve, get hold of (*quir*= seek i.e *conquer*, *inquiry*) əˈkwaɪə
retain= keep, hold, maintain ɪˈteɪn
judicious= wise, sensible #stupid #foolish dʒuːˈdɪʃəs

aim= goal, purpose, target, intention eɪm
sector= segment, part, area, zone, field ˈsektə
emphasize= highlight, underline, stress, #understate ˈemfəsaɪz
work-life balance = the ability to give a sensible amount of time and effort to your work and to your life outside work wɜːklaɪf ˈbæl. əns
address= solve, tackle, deal with, handle, cope with əˈdres

possess= own, have, retain, #lack (*sess*=sit i.e *obsession*, *reside*) peˈzes
capability= ability, competence, potential, #inability (*cap*= hold i.e *caption*, *capacious*) keɪpeɪˈbɪlɪti

competitive advantage. Despite this **recognition** of the importance of employee development, the **hospitality industry** has historically been **dominated** by **underdeveloped** HR practices (Lucas, 2002).

Lucas also points out that 'the **substance** of HRM practices does not appear to be designed to **foster constructive** relations with employees or to **represent** a managerial approach that **enables** developing and **drawing out** the full potential of people, even though employees may be **broadly** satisfied with many **aspects** of their work' (Lucas, 2002). In addition, or maybe as a result, high **employee turnover** has been a **recurring** problem throughout the hospitality industry. Among the many **cited** reasons are low **compensation**, **inadequate** benefits, poor working conditions and **compromised** employee **morale** and attitudes (Maroudas et al., 2008).

Ng and Sorensen (2008) **demonstrated** that when managers provide **recognition** to employees, **motivate** employees to work together, and remove **obstacles** preventing effective performance, employees feel more **obligated** to stay with the company. This was **succinctly summarized** by Michel et al. (2013): '[P]roviding support to employees gives them the confidence to perform their jobs better and the motivation to

competitive advantage = an advantage that makes a company more able to succeed in competing with others (**pet**= *strive toward i.e appetite, petition*) kəm'petətɪv əd'vɑːntɪdʒ
recognition= identification, know, awareness (**gnit**= *know i.e cognition, ignorant*) rekəg'nɪʃn

motivate= inspire, provoke, encourage (**mot**= *move i.e mobile, promote*) 'məʊtɪveɪt
obstacle= difficulty, problem, barrier 'ɒbstəkl
obligated= grateful, appreciative, thankful 'ɒblɪgeɪtɪd
succinctly= briefly, in short, concisely sək'sɪŋktli
summarize= review, sum up, recap (**sum**= *sum i.e consummate, summation*) 'sʌməraɪz

stay with the organization.' Hospitality organizations can therefore **enhance** employee motivation and **retention** through the development and improvement of their working conditions. These conditions are **inherently** linked to the working environment.

While it seems likely that employees' **reactions** to their job **characteristics** could be affected by a **predisposition** to view their work environment negatively, no evidence exists to support this **hypothesis** (Spector et al., 2000). However, given the **opportunity**, many people will find something to complain about **in relation to** their workplace (Poulston, 2009). There is a strong link between the **perceptions** of employees and particular factors of their work environment that are **separate** from the work itself, including company policies, salary and vacations.

Such conditions are particularly **troubling** for the luxury hotel market, where high-quality service, requiring a **sophisticated** approach to HRM, is recognized as a critical source of competitive advantage (Maroudas et al., 2008). **In a real sense**, the services of hotel employees represent their industry (Schneider and Bowen, 1993). This representation has commonly been limited to guest experiences. This suggests that there has been a **dichotomy** between the guest environment provided in luxury hotels and the working conditions of their employees.

It is therefore essential for hotel management to develop HRM practices that **enable** them to inspire and **retain competent** employees. This requires an understanding of what motivates employees at different levels of management and different stages of their careers (Enz and Siguaw, 2000). This **implies** that it is beneficial for hotel managers to understand what practices are most favorable to increase **employee** satisfaction and **retention**.

Herzberg (1966) proposes that people have two major types of needs, the first being **extrinsic** motivation factors relating to the **context** in which work is performed, rather than the work itself. These include working conditions and **job security**. When these factors are unfavorable, job dissatisfaction may result. Significantly, though, just fulfilling these needs does not result in satisfaction, but only in the reduction of dissatisfaction (Maroudas et al., 2008).

Employees also have **intrinsic** motivation needs or motivators, which include such factors as achievement and

enhance= improve, increase, develop *in'hɑ:ns*
retention= keeping, holding, retaining, preservation (*tent*= hold i.e *content*, *abstain*, *contain*) *ri'tenʃn*
inherently= integrally, fundamentally, essentially, naturally, intrinsically, #superficially (*here*= stick i.e *inhere*, *adhesive*) *in'hɪərəntli*

reaction= response, reply, feedback (*act*= do i.e *action*, *actor*, *agent*) *ri'ækʃn*
characteristic= trait, quality, personality *kærek'tɪrɪstɪk*
predisposition= tendency, predilection, disposition, bias (*posit*= put i.e *position*, *opposite*) *pri:dispe'zɪʃn*
hypothesis= theory, suggestion, assumption (*the*= put i.e *synthesis*, *anathematic*) *haɪ'pɒθəsɪs*
opportunity= chance, prospect, occasion *ɒpə'tju:nɪti*
in relation to = related to, concerning, with regard to *ɪn ri'leɪʃn tu:*
perception= insight, awareness, view, opinion, recognition (*per*=thoroughly i.e *perfection*, *persistence*) *pə'sepʃn*
separate= split, divide, disconnect *'seprət*

troubling = worrying, concerning, disturbing, #soothing *'trʌblɪŋ*
sophisticated= complex, complicated, advanced (*soph*= wise i.e *philosophy*, *sophism*) *sə'fɪstɪkətɪd*
in a real sense = sth is partly true, or true in one way, in one aspect (*sens*= feel i.e *sensory*, *consent*) *ɪn ə riəl sens*
dichotomy= contrast, opposition, contradiction (*tom*= cut i.e *anatomy*, *polytomy*) *daɪ'kɒtəmi*

enable= allow, make possible, permit *ɪ'neɪbəl*
retain = keep, hold, maintain *ri'teɪn*
competent= experienced, knowledgeable, skilled *'kɒmpɪtənt*
imply= indicate, mean, suggest *ɪm'plaɪ*
employee retention= the ability of a company to keep its employees and stop them from going to work somewhere else *em'plɔɪ'i: ri'tenʃn*

extrinsic= external, outside, outer *ek'strɪnsɪk*
context = situation, environment, circumstance (*text*= weave i.e *textile*, *pretext*) *'kɒntekst*
job security = a job with a high level of security is such that a person with the job would have a small chance of losing it. *dʒɒb sɪ'kjʊərɪti*

intrinsic= inside, inherent, innate, inner, #extrinsic *ɪn'trɪnsɪk*

recognition. Unlike extrinsic factors, motivator factors may ideally result in job satisfaction (Maroudas et al., 2008). Herzberg's (1966) theory discusses the need for a 'balance' of these two types of needs.

The impact of fun as a motivating factor at work has also been explored. For example, Tews, Michel and Stafford (2013) **conducted** a study focusing on staff from a **chain of themed restaurants** in the United States. It was found that fun activities had a favorable impact on performance and manager support for fun had a favorable impact in reducing **turnover**. Their findings support the view that fun may indeed have a beneficial effect, but the **framing** of that fun must be carefully **aligned** with both organizational goals and employee characteristics. 'Managers must learn how to achieve the **delicate** balance of allowing employees the freedom to enjoy themselves at work while **simultaneously** maintaining high levels of performance' (Tews et al., 2013). Deery (2008) has recommended several actions that can be **adopted** at the organizational level to retain good staff as well as **assist** in balancing work and family life. Those particularly **appropriate** to the hospitality industry include allowing **adequate** breaks during the working day, staff functions that involve families, and providing health and **well-being** opportunities.

conduct= do, perform, accomplish, carry out kən'dʌkt
a chain of = a set of connected or related things ə'tʃeɪn ɒv
themed restaurant = A themed restaurant is a type of restaurant that uses theming to attract diners by creating a memorable experience. ðəmd 'restrɒnt
turnover= the rate at which people leave an organization and are replaced by others 'tʃ:nəʊvə
framing = bordering, enclosing, surrounding, set up, #insetting 'freɪmɪŋ
aligned = associated, support, side with, line up with ə'laɪnd
delicate= fragile, weak, slight, elegant 'delɪkət
simultaneously= at the same time, concurrently, instantaneously, at once (**simul**= imitating i.e **similar**, **assimilate**) sɪml'teɪnɪəsli
adopt= accept, implement, embrace (**opt**=choose i.e **option**, **optative**) ə'dɒpt
assist= support, help, aid (**sist**= cause to stand i.e **consist**, **exist**, **insist**) ə'sɪst
appropriate= suitable, fitting, apt, proper (**propri**= property i.e **proper**, **propriety**) ə'prəʊpriət
adequate = enough, sufficient, #inadequate, #insufficient (**equ**= equal i.e **equity**, **equivalence**) 'ædɪkwət
well-being = happiness, comfort, welfare, safety wel'bi:ɪŋ

Nếu học được một lượng từ vựng lớn thì các bạn sẽ không phải quan tâm đến tip này hay trick kia khi làm bài thi IELTS Reading. Mình tin là có những bạn 1 tuần đọc liên tục được 2 cuốn Boost your vocabulary, thậm chí là hơn. Truyện dài mấy trăm trang mà nhiều bạn có thể đọc xong trong 1 đêm, còn 1 cuốn Boost your vocabulary là khá mỏng, và lại toàn từ đã được tra sẵn. Vậy nên hãy cố gắng đọc thật nhanh nhé các bạn 😊

Đình Thắng

TEST 2

READING PASSAGE 1

Alexander Henderson
(1831 - 1913)

Born in Scotland, Henderson **emigrated** to Canada in 1855 and became a **well-known** landscape photographer Alexander Henderson was born in Scotland in 1831 and was the son of a successful **merchant**. His grandfather, also called Alexander, had **founded** the family business, and later became the first **chairman** of the National Bank of Scotland. The family had **extensive** **landholdings** in Scotland. Besides its **residence** in Edinburgh, it owned Press Estate, 650 **acres** of farmland about 35 miles southeast of the city. The family often stayed at Press Castle, the large **mansion** on the northern **edge** of the **property**, and Alexander spent much of his childhood in the area, playing on the beach near Eyemouth or fishing in the **streams** nearby. Even after he went to school at Murcheston Academy on the **outskirts** of Edinburgh, Henderson returned to Press at weekends.

emigrate = migrate, relocate, move, abroad, leave your country, # return #immigrate. 'emigreɪt

well-known = famous, celebrated, renowned, legendary. 'wel nəʊn

merchant = seller, trader, wholesaler, dealer. 'mɜːtʃənt

found = create, start, establish, set up, #close found

chairman = chairperson, chair, chairwoman (someone who is in charge of a large company or organization) 'tʃeəməŋ

extensive = big, large, huge, massive, wide ɪk'stensɪv

landholding = the land that is own by someone 'lændhəʊldɪŋ

residence = house, home, dwelling (especially a large or official one) 'rezɪdəns

acres = a unit for measuring area, equal to 4,840 square yards or 4,047 square metres 'eɪkəz

mansion = hall, tower, castle 'mænjən

edge = rim, border, boundary edʒ

property = land, building, estate, belongings. 'prɒpəti

stream = watercourse, small river, torrent stri:m

outskirts = outer edge, border, suburb (that is furthest from its centre) 'aʊtskɜːts

In 1849 he began a three-year **apprenticeship** to become an **accountant**. Although he never liked **the prospect** of a business **career**, he stayed with it to **please** his family. In October 1855, however, he emigrated to Canada with his wife Agnes Elder Robertson and they **settled in** Montreal.

Henderson learned photography in Montreal around the year 1857 and quickly **took it up** as a serious **amateur**. He became a **personal friend** and colleague of the Scottish-Canadian photographer William Notman. The two men made a photographic **excursion** to Niagara Falls in 1860 and they **cooperated** on **experiments** with **magnesium flares** as a source of **artificial** light in 1865. They belonged to the same societies and were among the founding members of the Art **Association** of Montreal. Henderson acted as chairman of the association's first meeting, which was held in Notman's studio on 11 January 1860.

In spite of their friendship, their styles of photography were quite different. While Notman's landscapes were noted for their **bold realism**, Henderson for the first 20 years of his career produced romantic images, showing the strong **influence** of the British landscape tradition. His **artistic** and technical progress was rapid and in 1865 he published his first major collection of landscape photographs. The **publication** had limited **circulation** (only seven copies have ever been found), and was called Canadian Views and Studies. The contents of each copy **vary** significantly and have **proved** a useful source for **evaluating** Henderson's early work.

In 1866, he gave up his business to open a photographic studio, **advertising** himself as a **portrait** and landscape photographer. From about 1870 he **dropped portraiture** to **specialize** in landscape photography and other views. His **numerous** photographs of city life **revealed** in street scenes, houses, and markets are alive with human activity, and although his favourite subject was landscape he usually **composed** his scenes around

apprenticeship= traineeship, internship, training
ə'prentɪʃɪp
accountant = bookkeeper, auditor (someone whose job is to keep and check financial accounts, calculate taxes etc) ə'kaʊntənt
the prospect of = possibility, vision, potential. ði:prə'spekt ɒv
please = satisfy, give pleasure to, make happy, pli:z
settled in= to begin to feel happy and relaxed in a new situation, home, job, or school 'setlɪd ɪn

take it up= to start a new job or have a new responsibility 'teɪk 'ɪt ʌp
amateur = layperson, beginner, apprentice, #professional #expert 'æməteɪ
personal friend= someone who you know well, especially a famous or important person 'pɜ:sənəl 'frend
excursion= trip, tour, expedition, journey. ɪk'skɜ:ʃən
cooperate = work together, work as a team, collaborate kəʊ'ɒpəreɪt
experiments= trial, test, research. ɪk'sperɪmənts
magnesium= a chemical element (symbol: Mg) mæɡ'ni:ziəm
flare= flash, blaze, sparkle fleə
artificial= man-made, non-natural, synthetic, #natural, #real ɑ:'trɪ'fɪʃl
association= organisation, union, alliance ə,səʊʃi'eɪʃn

in spite of = despite, although, regardless of, even though ɪn spaɪt ɒv
bold= noticeable, showy, confident bəʊld
realism = practicality, #impracticality
#idealism #romanticism 'ri:əlizəm
influence= effect, impact, repercussions 'ɪnfluəns
artistic= creative, imaginative, inventive, arty ɑ:'tɪstɪk
publication = journal, newspaper, magazine pʌblɪ'keɪʃn
circulation = distribution, readership, sales sɜ:kju'leɪʃn
vary= differ, change, diverge, be different 'veəri
prove= show, demonstrate, evidence #disprove pru:v
evaluate= assess, estimate, value, calculate ɪ'væljuet

advertise= publicize, market, announce, promote 'ædvətaɪz
drop = stop, give up, abandon, #maintain drɒp
portrait = a drawing, painting, or photograph of a person 'pɔ:trɪt
specialize = specify, concentrate, focus 'speʃəlaɪz
numerous = many, plentiful, abundant 'nju:mərəs
reveal= expose, uncover, bring to light ri'veɪl

compose = produce, create, make, compile kəm'pəʊz

such human **pursuits** as farming the land, cutting ice on a river, or sailing down a woodland stream. There was **sufficient** demand for these types of scenes and others he took **depicting** the **lumber** trade, steamboats and waterfalls to **enable** him to make a living. There was little competing hobby or amateur photography before the late 1880s because of the **time-consuming** techniques involved and the weight of the equipment.

People wanted to buy photographs as **souvenirs** of a trip or as gifts, and **catering** to this market, Henderson had **stock** photographs on display at his studio for **mounting**, framing, or **inclusion** in albums

Henderson frequently **exhibited** his photographs in Montreal and abroad, in London, Edinburgh, Dublin, Paris, New York, and Philadelphia. He met with greater success in 1877 and 1878 in New York when he won first prizes in the exhibition held by E and HT Anthony and Company for landscapes using the Lambertype process. In 1878 his work won second prize at the world exhibition in Paris.

In the 1870s and 1880s Henderson travelled widely **throughout** Quebec and Ontario, in Canada, **documenting** the major cities of the two provinces and many of the villages in Quebec. He was especially **fond of** the **wilderness** and often travelled by **canoe** on the Blanche, du Lievre, and other noted eastern rivers. He went on several occasions to the Maritimes and in 1872 he **sailed** by **yacht** along the lower north **shore** of the St Lawrence River. That same year, while in the lower St Lawrence River region, he took some photographs of the construction of the **Intercolonial** Railway. This **undertaking** led in 1875 to a **commission** from the railway to **record** the **principal** structures along the almost-completed line connecting Montreal to Halifax. Commissions from other railways followed. In 1876 he photographed bridges on the Quebec, Montreal, Ottawa and Occidental Railway between Montreal and Ottawa. In 1885 he went west along the Canadian Pacific Railway (CPR) as far as Rogers Pass in British Columbia, where he took photographs of the mountains and the progress of construction.

In 1892 Henderson accepted a full-time position with the CPR as manager of a photographic department which he was to set up and

pursuit= pastime, interest, leisure activity *pə'sju:t*
sufficient = enough, adequate, plenty, appropriate. *sə'fɪʃnt*
depict = show, illustrate, describe, represent *dɪ'pɪkt*
lumber = wood, logs, timber, planks *'lʌmbə*
enable = allow, permit, support, assist, aid, facilitate, #prevent *ɪ'neɪbl*
time-consuming = laborious, slow, timewasting, #timesaving *'taɪmkən'sju:mɪŋ*

souvenir = keepsake, memento, reminder, gift. *su:və'niə*
cater= provide, supply, accommodate *'keɪtə*
stock= keep, have, carry, sell, supply *stɒk*
mounting = encasing, exhibiting, installing, framing. *'maʊntɪŋ*
inclusion = insertion, attachment, addition, #absence, #exclusion *ɪn'klu:ʒn*
exhibit= show, display, reveal, present *ɪg'zɪbɪt*

throughout = in or into every part of something *θru:'aʊt*
document= record, keep a record, write down, provide evidence *'dɒkjʊmənt*
be fond of = be keen on, be in love with, enjoy, find irresistible *bɪ fɒnd ɒv*
wilderness= wild, wasteland, desert. *'wɪldənəs*
canoe = kayak, outrigger, coracle, dugout, pirogue, piragua *kə'nu:*
sail= cruise, travelling in a ship, go in a boat, set sail *seɪl*
yacht = ship, vessel, cruiser, ferry *jɒt*
shore = bank, the waterfront, riverside. *ʃɔ:*
Intercolonial Railway = was a historic Canadian railway that operated from 1872 to 1918 *ɪntəkə'ləʊnjəl 'reɪlweɪ*
undertaking = mission, duty, task *ʌndə'teɪkɪŋ*
commission= committee, agency, board *kə'mɪʃn*
record = document, chronicle, keep information *rɪ'kɔ:d*
principal= main, major, prime, key *'prɪnsəpl*

administer. His **duties** included spending four months in the field each year. That summer he made his second trip west, photographing **extensively** along the railway line as far as Victoria. He continued in this **post** until 1897, when he **retired** completely from photography.

When Henderson died in 1913, his huge collection of **glass negatives** was stored in the **basement** of his house. Today collections of his work are held at the National Archives of Canada, Ottawa, and the McCord Museum of Canadian History, Montreal.

administer = manage, run, control, govern

əd'mɪnɪstə

duty= task, responsibility, undertaking 'dju:ti

extensively= greatly, much, highly, considerably, significantly ɪk'stensɪvli

post = position, placement, job, workplace pəʊst

retired = stop working, give up work, be pensioned off, step down, rɪ'taɪəd

glass negatives = The term most commonly refers to two formats, collodion wet plate negatives and gelatin dry plate negatives. Both formats consist of a light sensitive emulsion fixed to a glass plate base with a binder gla:s 'negətɪvz

basement= a part of a building that is below the level of the first floor 'beɪsmənt

READING PASSAGE 2

Back To The Future Of Skyscraper Design

Answers to the problem of **excessive** electricity use by **skyscrapers** and large public buildings can be found in **ingenious** but forgotten architectural designs of the 19th and early-20th centuries.

AThe **Recovery** of Natural Environments in Architecture by Professor Alan Short is the **culmination** of 30 years of research and award-winning green building design by Short and colleagues in Architecture, Engineering, Applied Maths and **Earth Sciences** at the University of Cambridge.

'The **crisis** in building design is already here,' said Short. 'Policy makers think you can solve energy and building problems with **gadgets**. You can't. As global temperatures continue to rise, we are going to continue to **squander** more and more energy **on** keeping our buildings **mechanically** cool until we have **run out of capacity**.'

BShort is calling for a **sweeping reinvention** of how skyscrapers and major public buildings are designed - to end the **reliance** on **sealed buildings** which exist **solely via** the 'life support'

excessive= extreme, too much, unnecessary ɪk'sesɪv
skyscraper = tower, multistory building, high-rise building. 'skaɪskreɪpə
ingenious= skillful, creative, effective, clever ɪn'dʒiːniəs

recovery= improvement, revival, retrieval, healing, rɪ'kʌvəri
the culmination of sth= something, especially something important, that happens at the end of a long period of effort or development ðə ,kʌlmɪ'neɪʃən əv
Earth sciences = the branch of science dealing with the physical constitution of the earth and its atmosphere. 'ɜːθ 'saɪənsɪz
crisis= disaster, catastrophe, difficulty 'kraɪsɪs
gadget= tool, gizmo, machine, device, appliance 'gædʒɪt
squander (on)= waste, consume, spend 'skwɒndər ɒn
mechanically= automatically, instinctively, unconsciously, without thinking #consciously mɪ'kæniːklɪ
run out (of)= be used up, end, expire, finish, come to an end 'rʌn aʊt ɒv
capacity= power, ability, volume, #inability kə'pæsɪti

sweeping= far-reaching, comprehensive, wide-ranging, widespread, #restricted 'swiːpɪŋ
reinvent = reform, to make changes in order to improve it or make it more modern ,riːn'vent
reliance = dependence, support, #independence rɪ'laɪəns
sealed = closed, stuck #opened siːld
solely=exclusively, only, lone, merely, just 'səʊli
via = through, thru, by, by means of, using 'vaɪə

system of **vast** air conditioning units. Instead, he shows it is entirely possible to **accommodate** natural **ventilation** and cooling in large buildings by looking into the past, before the widespread introduction of air conditioning systems, which were '**relentlessly** and **aggressively marketed**' by their inventors.

C

Short points out that to make most **contemporary** buildings **habitable**, they have to be **sealed** and air conditioned. The energy use and carbon **emissions** this generates is **spectacular** and largely unnecessary. Buildings in the West account for 40-50% of electricity usage, generating **substantial** carbon emissions, and the rest of the world is **catching up** at a **frightening** rate. Short regards glass, steel and air-conditioned skyscrapers as symbols of status, rather than practical ways of meeting our requirements.

D

Short's book **highlights** a developing and **sophisticated** art and science of ventilating buildings through the 19th and earlier-20th centuries, including the design of ingeniously ventilated hospitals. Of particular interest were those built to the designs of John Shaw Billings, including the first Johns Hopkins Hospital in the US city of Baltimore (1873-1889). 'We spent three years digitally modelling Billings' final designs,' says Short. 'We put **pathogens** in the **airstreams**, **modelled** for someone with **tuberculosis** (TB) **coughing** in the **wards** and we found the ventilation systems in the room would have kept other patients safe from harm.'

E

'We discovered that 19th-century hospital wards could **generate** up to 24 **air changes** an hour - that's similar to the performance of a modern-day, computer-controlled operating theatre. We believe you could build wards based on these principles now.

Single rooms are not **appropriate** for all patients. **Communal** wards appropriate for certain patients - older people with **dementia**, for example - would work just as well in today's hospitals, at a **fraction** of the energy cost.'

vast = massive, huge, immense, considerable, #small
vɑːst
accommodate= supply, provide, assist əˈkɒmədeɪt
ventilation=the movement of fresh air around a closed space, or the system that does this ventɪˈleɪʃn
relentless= unstoppable, persistent, #gentle, #moderate rɪˈlentləs
aggressive=forceful, strong, insistent #mild əˈɡresɪv
market (verb)= advertise, promote, sale ˈmɑːkɪt

contemporary = current, modern, latest, up-to-date
kənˈtempərəi
habitable= livable, comfortable, inhabitable, fit to, #uninhabitable ˈhæbɪtəbəl
sealed= closed, wrapped, stuck down siːld
emission= a gas or other substance that is sent into the air ɪˈmɪʃn
spectacular= remarkable, outstanding, stunning, impressive, #unimpressive spekˈtækjələ
substantial= significant, plentiful, abundant səbˈstænʃl
catching up = to come from behind and reach someone in front of you by going faster ˈkætʃɪŋ ʌp
frightening = scary, making you feel afraid or nervous ˈfraɪtɪŋ
highlight= underline, emphasize, stress, draw attention to, bring to light ˈhaɪlaɪt

sophisticated= complex, advance, complicated səˈfɪstɪkətɪd
pathogen= virus, bacterium, germ ˈpæθədʒən
airstream= a current of air ˈeəstriːm
model = show, demonstrate, display #show off ˈmɒdl
tuberculosis = a serious infectious disease that can attack many parts of a person's body, especially their lungs. tjʊːbɜːkjʊˈləʊsɪs
coughing= to suddenly push air out of your throat with a short sound, often repeatedly ˈkɒfɪŋ
ward= a large room in a hospital which is used for treating people with similar illnesses or conditions wɔːd

generate= produce, make, form, create ˈdʒenəreɪt
air change = a measure of how many times the air within a defined space (normally a room or house) is replaced ˈeə tʃeɪndʒ

appropriate= fitting, suitable, applicable, #inappropriate əˈprəʊprɪət
communal= shared, public, #private ˈkɒmjʊnəl
dementia = a medical condition that affects especially old people, causing the memory and other mental abilities to gradually become worse, and leading to confused behaviour dɪˈmenʃə
fraction = a small part, segment, part, section ˈfrækʃn

Professor Short **contends** the **mindset** and **skill-sets** behind these designs have been completely lost, **lamenting** the disappearance of expertly designed theatres, opera houses, and other buildings where up to half the **volume** of the building was given over to ensuring everyone got fresh air.

F

Much of the **ingenuity** present in 19th-century hospital and building design was driven by a **panicked** public **clamouring** for buildings that could protect against what was thought to be the **lethal** threat of **miasmas** - **toxic** air that spread disease. Miasmas were feared as the **principal** **agents** of disease and **epidemics** for centuries, and were used to explain the spread of **infection** from the Middle Ages right through to the **cholera outbreaks** in London and Paris during the 1850s. **Foul** air, rather than **germs**, was believed to be the main **driver** of 'hospital fever', leading to disease and frequent death. The **prosperous** **steered** clear of hospitals. While miasma **theory** has been long since **disproved**, Short has for the last 30 years **advocated** a return to some of the building design principles produced **in its wake**.

G

Today, huge amounts of a building's space and construction cost **are given over** to air conditioning. 'But I have designed and built a series of buildings over the past three decades which have tried to **reinvent** some of these ideas and then measure what happens. 'To go forward into our new low-energy, low-carbon future, we would be well advised to look back at design before our high-energy, high-carbon present appeared. What is surprising is what a rich **legacy** we have **abandoned**.'

H

Successful examples of Short's approach include the Queen's Building at De Montfort University in Leicester. Containing as many as 2,000 staff and students, the entire building is naturally **ventilated**, passively cooled and naturally **lit**, including the two largest **auditoria**, each **seating** more than 150 people. The award-winning building uses a **fraction** of the electricity of **comparable** buildings in the UK.

contend = argue, claim, insist, declare kən'tend
mindset = attitude, outlook, approach, belief, frame of mind, way of thinking 'maɪndset
skill-set = the range of things that someone is good at, especially things that are useful in a particular job 'skɪl set

lament= to express sadness and feeling sorry about something lə'ment
volume= amount, quantity, degree, number 'vɒlju:m

ingenuity= creativity, inventiveness, resourcefulness, imagination, initiative ɪndʒɪ'nju:ɪti

panicked= nervous, worried, frightened, 'pænɪkt
clamour= demanding, call out, insisting, #whispering 'klæmə

lethal= deadly, fatal, mortal, poisonous, toxic 'li:θl

miasma = mist, fog, haze mɪ'æzmə

toxic = harmful, detrimental, damaging 'tɒksɪk

principal= main, major, key, primary 'prɪnsəpl

agent = cause, vehicle, driving force 'eɪdʒənt

epidemic= the appearance of a particular disease in a large number of people at the same time epi'demɪk

infection= disease, illness, virus ɪn'fekʃn

cholera = a serious disease that causes sickness and sometimes death. It is caused by eating infected food or drinking infected water. 'kɒlərə
outbreak= suddenly starts to happen 'aʊtbreɪk

foul= unpleasant, stinking, disgusting, #clean faʊl

germ= bacteria, virus, bug dʒɜ:m

driver = cause, reason, source 'draɪvə

the prosperous= rich people, the rich, wealthy people, the wealthy ðə 'prɒspərəs

steer clear = to avoid sb or sth unpleasant or difficult. strə klɪə

theory = hypothesis, speculation, assumption 'θiəri

disprove = invalidate, negate, refute, show to be false, #prove dɪs'pru:v

advocate= support, back, suggest, promote 'ædvəkeɪt
in somebody's/something's wake= behind or after someone or something ɪn 'səm,bɑ:di 'sʌmθɪŋz weɪk

give over= to stop doing or saying something that is annoying other people gɪv 'əʊvə

reinvent = remake, revive, reform. ri:ɪn'vent

legacy= heritage, inheritance, inheritance 'legəsi

abandon = discard, give up, stop. ə'bændən

ventilate = to let fresh air into a room, building etc 'ventɪleɪt

lit = past form of **light**

light = to provide light for a place laɪt

auditorium- auditoria (plural) = hall, theatre ɔ:'dɪ'tɔ:riəm - ,ɔ:'dɪ'tɔ:riə

seat = accommodate, contain, hold, take si:t

fraction = portion, segment, part, #whole 'frækʃn

comparable = similar, equivalent, equal, as good as, #dissimilar 'kɒmpərəbəl

Short **contends** that glass skyscrapers in London and around the world will become a **liability** over the next 20 or 30 years if climate modelling predictions and energy price rises come to pass as expected.

He is **convinced** that **sufficiently** cooled skyscrapers using the natural environment can be produced in almost any climate. He and his team have worked on **hybrid** buildings in the **harsh** climates of Beijing and Chicago - built with natural ventilation assisted by **back-up** air conditioning - which, surprisingly perhaps, can be **switched off** more than half the time on **milder** days and during the spring and autumn. "My book is a **recipe** book which looks at the past, how we got to where we are now, and how we might **reimagine** the cities, offices and homes of the future. There are **compelling** reasons to do this. The Department of Health says new hospitals should be naturally ventilated, but they are not. Maybe it's time we changed our **outlook**."

contend (that) = insist, to argue or state that something is true kən'tend ðæt
liability= accountability, legal responsibility, obligation, charge laɪə'bɪlɪti

convince= persuade, prove, influence kən'vɪns
sufficiently = adequately, satisfactorily, suitably, appropriately, #inadequately sə'fɪʃntli
hybrid = combination, mixture, cross 'haɪbrɪd
harsh= hard, serve, tough hɑːʃ
back-up = something that you can use to replace something that does not work or is lost bæk ʌp
switched off= to turn off a machine, light, radio etc using a switch swɪtʃt ɒf
milder= warmer, pleasanter, clement 'maɪldə
recipe= method, formula, guidelines, instructions, steps resəpi
reimagine= reinterpret (an event, work of art, etc.) imaginatively; rethink. ri:ɪ'mædʒɪn
compelling= convincing, powerful, persuasive, forceful, undeniable kəm'pelɪŋ
outlook= viewpoint, attitude, view, point of view 'aʊtlʊk

READING PASSAGE 3

Why Companies Should Welcome Disorder

A

Organisation is big business. Whether it is of our lives - all those inboxes and calendars or how companies are **structured**, a multi-billion-dollar industry helps to meet this need. We have more **strategies** for time management, project management and self-organisation than at any other time in human history. We are told that we **ought to** organise our company, our home life, our week, our day and even our sleep, all as a **means** to becoming more **productive**. Every week, **countless seminars** and **workshops take place** around the world to tell **a paying public** that they ought to structure their lives in order to achieve this.

This **rhetoric** has also **crept into** the thinking of business leaders and **entrepreneurs**, much to the **delight** of self-**proclaimed perfectionists** with the need to get everything right. The number of business schools and graduates has **massively** increased over the past 50 years, essentially teaching people how to organise well.

disorder = chaos, disarrange, mess-up *dis'ɔ:də*
structured = arrange, organize, build up *'strʌktʃəd*
strategy = plan, scheme, approach, policy, line of attack *'strætədʒi*

ought to = should, had better, have to *'ɔ:t tu:*

a means = way, method, measure *ə mi:nz*

productive = energetic, generative, effective, profitable *prə'dʌktɪv*

countless = uncountable, limitless, immeasurable *'kaʊntləs*

seminar = workshop, meeting, discussion group *'seminɑ:*

take place = happen, occur (especially after being planned or arranged) *'teɪk 'pleɪs*

a paying public = those who buy or purchase something (seminars/ workshops) *ə 'peɪɪŋ 'pʌblɪk*

rhetoric = speech or writing that is intended to influence people, but that is not completely honest or sincere *'retərɪk*

creep = walk quietly and slowly, tiptoe *kri:p*

entrepreneur = businessperson, founder *ˌɒntrəprə'nɜ:*

delight = enjoyment, pleasure, joy, gladness *dɪ'laɪt*

proclaim = announce, declare, assert, state, say publicly *prə'kleɪm*

perfectionist = person who likes to do things perfectly and is not satisfied with anything less *pə'fekʃənɪst*

massively = hugely, enormously, immensely, vastly *'mæsɪvli*

B

Ironically, however, the number of businesses that fail has also steadily increased. Work-related stress has increased. A large proportion of workers from all **demographics** claim to be dissatisfied with the way their work is structured and the way they are managed. This **begs the question**: what has gone wrong? Why is it that on paper the **drive** for organisation seems a sure **shot** for increasing productivity, but in reality **falls well short** of what is expected?

C

This has been a problem for a while now. Frederick Taylor was one of the **forefathers** of scientific management. Writing in the first half of the 20th century, he designed a number of principles to improve the **efficiency** of the work process, which have since become **widespread** in modern companies. So the approach **has been around** for a while.

D

New research suggests that this **obsession** with efficiency is **misguided**. The problem is not necessarily the management **theories** or strategies we use to organise our work; it's the basic **assumptions** we hold in **approaching** how we work. Here it's the assumption that **order** is a necessary condition for productivity. This assumption has also **fostered** the idea that disorder must be **detrimental** to organisational productivity. The result is that businesses and people spend time and money organising themselves **for the sake of** organising, rather than actually looking at the end goal and usefulness of such an effort.

E

What's more, recent studies show that order actually has **diminishing returns**. Order does increase productivity to a **certain extent**, but **eventually** the usefulness of the process of organisation, and the benefit it **yields**, reduce until the point where any **further** increase in order reduces productivity. Some argue that in a business, if the cost of **formally** structuring something **outweighs** the benefit of doing it, then that thing ought not to be formally structured. Instead, the resources involved can be better used elsewhere.

F

In fact, research shows that, when **innovating**, the best approach is to create an environment **devoid** of structure and **hierarchy** and **enable** everyone involved to engage as one **organic** group. These environments can lead to new

ironically= paradoxically, oddly, poignantly, fatefully, unluckily aɪˈrɒnɪkəlɪ

demographic= data relating to the population and groups of people in it deməˈɡræfɪk

beg the question= raise a question or point that has not been dealt with beg ðəˈkwɛstʃən

drive = motivation, effort, ambition draɪv

shot = try, attempt, chance ʃɒt

fall short of sth= to be less than the amount or standard that is needed or that you want fɔːl ʃɔːt əv

forefather= ancestor, forebear, precursor ˈfɔːfɑːðə

efficiency = competence, productivity, effectiveness ɪˈfɪʃnsi

widespread= extensive, prevalent, common, well-known, general, #limited ˈwaɪdspred

have been around= to have had experience of many different situations so that you can deal with new situations confidently həv biːn əˈraʊnd

obsession = an extremely unhealthy interest in smth or worry about sth, which stops you from thinking about anything else. əbˈseʃn

misguided= mistaken, unwise, foolish, wrong #wise mɪsˈɡaɪdɪd

theory= concept, hypothesis, philosophy ˈθiəri

assumption= belief, idea, guess, hypothesis, theory əˈsʌmpʃn

approach= move toward, come close to, come near to. əˈprəʊtʃ

order = well-organized state in which everything is controlled, well organized, and correctly arranged ˈɔːdə

foster= encourage, promote, raise, #discourage ˈfɒstə

detrimental= harmful, damaging, negative, unfavorable, disadvantageous detriˈmentl

for the sake of smb/smith= in order to help or bring advantage to smb/smith fə ðə seɪk əv

diminish= reduce, lessen, weaken, make smaller, #increase dɪˈmɪnɪʃ

return= profit, gain, earning rɪˈtʃːn

a certain extent = partly, but not completely əˈsɜːtɪn rɪˈkʰstent

eventually = finally, ultimately, sooner or later, in the end, #immediately ɪˈventʃʊəli

yield= produce, bear, generate, bring in jɪˈld

formally= properly, correctly, officially, legally ˈfɔːmlɪ

outweigh= to be more important or valuable than something else aʊtˈweɪ

innovate= to start to use new ideas, methods, or inventions ˈɪnəveɪt

be devoid of sth= without, empty, barren (to be completely lacking in something) #full biː dɪˈvɔɪd əv

hierarchy= grading, rank, order ˈhaɪəɹəːki

enable = allow, empower, aid, assist, facilitate, make possible, #prevent ɪˈneɪbəl

organic = natural, unprocessed, nonchemical, #inorganic, #artificial ɔːˈɡænɪk

solutions that, under **conventionally** structured environments (filled with **bottlenecks in terms of** information flow, power structures, rules, and routines) would never be reached.

G

In recent times companies have slowly started to **embrace** this **disorganisation**. Many of them embrace it in terms of **perception** (embracing the idea of disorder, **as opposed to** fearing it) and **in terms of** process (putting **mechanisms** in place to reduce structure).

For example, Oticon, a large Danish manufacturer of hearing **aids**, used what it called a 'spaghetti' structure in order to reduce the organisation's **rigid** hierarchies. This involved **scrapping** formal job titles and giving staff huge amounts of **ownership** over their own time and projects. This approach proved to be highly successful **initially**, with clear improvements in worker productivity in all **facets** of the business.

In similar fashion, the former chairman of General Electric embraced disorganisation, **putting forward** the idea of the 'boundary less' organisation. Again, it involves breaking down the barriers between different parts of a company and encouraging **virtual collaboration** and flexible working. Google and a number of other tech companies have embraced (at least in part) these kinds of flexible structures, **facilitated** by technology and strong company values which **glue** people together.

H

A word of warning to others thinking of **jumping on this bandwagon**: the evidence so far suggests disorder, much like order, also seems to have diminishing **utility**, and can also have detrimental effects on performance if **overused**. Like order, disorder should be embraced only so far as it is useful. But we should not fear it - nor **venerate** one over the other. This research also shows that we should continually question whether or not our existing assumptions work.

conventionally= traditionally, conservatively, normally, #unconventionally, unusually kən'venʃənəli
bottleneck = delay, postponement, putting off, hindrance, impediment 'bɒtlnɛk
in terms of sth = in relation to something ɪn tɜ:mz əv

embrace= accept, include, adopt, support, #exclude ɪm'breɪs
disorganisation= disorder, incompetence, inefficiency, ineffectiveness, #organization, #efficiency dɪ, sɔ:'.gə.naɪ'zeɪ.ʃən
perception = insight, awareness, view, opinion pə'sepʃən
as opposed to= versus, contrasted with, as against, compared with əz ə'pəʊzd tu:
mechanism= procedure, process, system, operation, vehicle 'mekənɪzəm

aid = assistance, service, support eɪd
rigid= fixed, inflexible, strict, unbending 'rɪdʒɪd
scrap = reject, eliminate, remove skræp
ownership= the right or state of being an owner 'əʊnəʃɪp
initially= firstly, originally, in the beginning, at first. ɪ'nɪʃəli
facet= aspect, part, sid 'fæst

in a ...fashion= in a particular way ɪn ə 'fæʃ.ən
putting forward = propose, offer, state 'pʊtɪŋ 'fɔ:wəd
boundary= border, limit, frontier 'baʊndrɪ
virtual= computer-generated, simulated, cybernetic, #actual 'vɜ:tʃʊəl
collaboration = teamwork, partnership, association kə,læbə'reɪʃən
facilitate = enable, assist, aid, make easy, make possible, #impede fə'sɪlɪteɪt
glue= connect, link, join glu:

jump/climb on the bandwagon= to join others in doing or supporting something fashionable or likely to be successful dʒʌmp 'klaɪm 'ɒn ðə 'bænd,wæɡən
utility = usefulness, effectiveness, efficiency, value ju:'tɪlɪti
overuse = the act of using something too much or too often əʊvə'ju:z
venerate= revere, respect, admire, look up 'venərəɪt

Nhiều bạn ngại là đọc cuốn này xong thì làm test không đánh giá đúng nữa? Thật ra câu trả lời là **KHÔNG PHẢI NHƯ VẬY**. Ở đầu sách đã ghi rất rõ là bạn cần phải làm test trước và sau đó thì dùng cuốn này để không phải mất công tra từ điển, cộng thêm với việc học synonym (từ đồng nghĩa) để hiểu đoạn văn nói gì.

Tuy nhiên, với các bạn band Reading đã ở tầm 7.0-8.0 thì cũng không cần phải làm test quá nhiều nữa. Tập trung vào đọc bài cho thật hiểu, đến từ nào không biết thì nhìn sang cột bên phải quyển Boost này để xem nghĩa của từ và lại đọc tiếp. **ĐỌC, ĐỌC, ĐỌC. HIỂU, HIỂU, HIỂU**. Cứ thế đọc mấy cuốn này như đọc báo, **KHÔNG PHẢI LÀM TEST NHIỀU**. Tự khắc điểm sẽ lên 8.0-9.0. Vì nếu học từ vựng mà không hiểu nội dung bài đọc thật sâu thì cũng vô nghĩa.

Hy vọng là sách bộ Boost your vocabulary - Cambridge IELTS này sẽ tiếp tục giúp được nhiều bạn tiết kiệm thời gian & đạt kết quả thật cao trong Reading!

Đình Thắng

TEST 3

READING PASSAGE 1

The Concept of Intelligence

A

Looked at in one way, everyone knows what intelligence is; looked at in another way, no one does. In other words, people all have **unconscious notions** - known as 'implicit theories' - of intelligence, but no one knows **for certain** what it actually is. This chapter **addresses** how people **conceptualize** intelligence, whatever it may actually be.

But why should we even care what people think intelligence is, **as opposed** only **to** valuing whatever it actually is? There are at least four reasons people's **conceptions** of intelligence **matter**.

B

First, implicit theories of intelligence **drive** the way in which people **perceive** and **evaluate** their own intelligence and that of others. To better understand the **judgments** people make about their own and others' abilities, it is useful to learn about people's implicit theories. For example, parents' implicit theories of their children's language development will

unconscious = unaware, insensible, senseless

#conscious ʌn'kɒŋʃəs

notion = idea, thought, concept, perception 'nəʊʃn

implicit = unspoken, indirect, implied, #explicit
ɪm'plɪsɪt

theory = hypothesis, assumption, speculation 'θiəri

for certain = for sure, certainly, surely fə'sɜ:tən

address = solve, deal with, tackle ə'dres

conceptualize = to form an idea or principle in your mind (=theorize, hypothesize) kən'sep.tʃu.ə.laɪz

as opposed to = used to compare two things and show that they are different from each other, contrast with, əz ə'pəʊzd tu:

conception = belief, idea, view, thought, notion
kən'sepʃn

matter = be important, have significant 'mætə

drive(v) = direct, lead, guide 'draɪv

perceive = sense, realise, feel, understand, become aware of pə'si:v

evaluate = assess, value, analyze, estimate ɪ'væljuet

judgment = assessment, view, decision, conclusion, opinion 'dʒʌdʒmənt

determine at what ages they will be **willing** to make **various** corrections in their children's speech. More generally, parents' implicit theories of intelligence will **determine** at what ages they believe their children are ready to **perform** various **cognitive** tasks. Job interviewers will make **hiring** decisions on the basis of their implicit theories of intelligence. People will decide who to be friends with **on the basis of** such theories. **In sum**, knowledge about implicit theories of intelligence is important because this knowledge is so often used by people to make judgments **in the course of** their everyday lives.

C

Second, the implicit theories of scientific **investigators** **ultimately give rise to** their **explicit** theories. Thus, it is useful to find out what these implicit theories are. Implicit theories provide a **framework** that is useful in **defining** the general **scope** of a **phenomenon** - especially a not-well-understood phenomenon. These implicit theories can suggest what aspects of the phenomenon have been more or less **attended to** in previous investigations.

D

Third, implicit theories can be useful when an investigator **suspects** that existing explicit theories are wrong or **misleading**. If an **investigation** of implicit theories **reveals** little **correspondence** between the **extant implicit** and explicit theories, the implicit theories may be wrong. But the **possibility** also needs to be **taken into account** that the explicit theories are wrong and **in need of** correction or **supplementation**. For example, some implicit theories of intelligence suggest the need for **expansion** of some of our explicit theories of the **construct**

E

Finally, understanding implicit theories of intelligence can help **elucidate** developmental and **cross-cultural** differences. As mentioned earlier, people have **expectations** for **intellectual performances** that **differ** for children of different ages. How

determine = decide, resolve, influence *dɪ'tɜːmɪn*
willing = ready, eager, keen, #reluctant, #unwilling *'wɪlɪŋ*
various = several, numerous, many, a number of, #few *'veəriəs*
perform = make, do, implement *pə'fɔːm*
cognitive = reasoning, mental, intellectual, rational *'kɒɡnətɪv*
on the basis of = based on, by reason of, because of, on account of *'ɒn ðə 'beɪsɪs ɒv*
in sum = in brief, in short, in summary *ɪn sʌm*
in the course of = during, throughout, in *ɪn ðə kɔːs ɒv*

investigator = detective, researcher *ɪn'vestɪɡeɪtə*
ultimately = eventually, finally, in the end, at last, #at first #initially *'ʌltɪmətli*
give rise to = to be the reason why something happens, especially something bad or unpleasant *ɡɪv raɪz tuː*
explicit = clear, obvious, plain #implicit #vague *ɪk'splɪsɪt*
framework = background, outline, context *'freɪmwɜːk*
defining = describing, outlining, explaining *dɪ'faɪnɪŋ*
scope = range, scale, extent *skəʊp*
phenomenon = occurrence, happening, event *fɪ'nɒmɪnən*
attend to = deal with, tackle *ə'tend tuː*

suspect = doubt, question, be suspicious, be wary, #trust *sə'spekt*
investigation = analysis, research, examination. *ɪn'vestrɪ'geɪʃn*
misleading = deceptive, misrepresenting, deceiving, confusing, #truthful *mɪs'liːdɪŋ*
reveal = expose, uncover, bring to light, #conceal. *rɪ'viːl*
correspondence = connection, association, correlation. *kɒrɪ'spɒndəns*
extant = existent, present, existing, in existence, #lost. *ek'stænt*
possibility = probability, chance, prospect *pə'sə'bɪlɪti*
take into account = take into consideration, consider, keep in mind *'teɪk 'ɪntə ə'kaʊnt*
in need of = need, require *ɪn niːd ɒv*
supplementation = the act of adding something to something else in order to improve or complete it. *sʌp.lɪ'men'teɪʃən*
expansion = increase, extension, growth *ɪk'spænjən*
construct = concept, hypothesis, theory *kən'strʌkt*

elucidate = explain, clarify, reveal, make clear, interpret, #confuse *ɪ'luːsɪdeɪt*
cross-cultural = multicultural, multiethnic, cosmopolitan *kros'kʌl.tʃərəl*
expectation = hope, prospect, probability, anticipation *ekspek'teɪʃən*
intellectual = knowledgeable, academic, highbrow, intelligent. *ɪntə'lektʃʊəl*
performance = the way that someone does their job, and how well they do it *pə'fɔːməns*
differ = vary, be different, diverge, be unlike *'dɪfə*

these expectations differ is in part a **function** of culture. For example, expectations for children who participate in Western-style schooling are almost certain to be different from those for children who do not participate in such schooling.

F

I have suggested that there are three **major** implicit theories of how intelligence relates to society **as a whole** (Sternberg, 1997). These might be called Hamiltonian, Jeffersonian, and Jacksonian. These views are not based **strictly**, but rather, **loosely**, on the **philosophies** of Alexander Hamilton, Thomas Jefferson, and Andrew Jackson, three great **statesmen** in the history of the United States.

G

The Hamiltonian view, which is similar to the Platonic view, is that people are born with different levels of intelligence and that those who are less intelligent need the good offices of the more intelligent to **keep them in line**, whether they are called government officials or, in Plato's **term**, philosopher-kings. Herrnstein and Murray (1994) seem to have shared this belief when they wrote about the **emergence** of a cognitive (high-IQ) **elite**, which eventually would have to **take responsibility for the** largely **irresponsible masses** of non-elite (low-IQ) people who cannot take care of themselves. Left to themselves, the unintelligent would create, as they always have created, a kind of **chaos**.

H

The Jeffersonian view is that people should have **equal** opportunities, but they do not **necessarily avail** themselves equally of these opportunities and are not necessarily equally rewarded for their **accomplishments**. People are rewarded for what they **accomplish**, if given equal opportunity. Low achievers are not rewarded to the same **extent** as high achievers. In the Jeffersonian view, the goal of education is not to favor or **foster** an elite, as in the Hamiltonian tradition, but rather to allow children the opportunities **to make full use of** the skills they have. My own views are similar to these (Sternberg, 1997).

The Jacksonian view is that all people are equal, not only as human beings but in terms of their **competencies** - that one person would serve as well as another in government or on a **jury** or in almost any position of responsibility. In this view of **democracy**, people are essentially **intersubstitutable** except

function(n) = purpose, role, utility 'fʌŋkʃn

major = main, prime, key, #minor 'meɪdʒə

as a whole = all together, as a group, as one, all in all əz ə həʊl

strictly = exactly, precisely, accurately 'strɪkli

loosely = freely, roughly, #firmly, #strictly 'luːsli

philosophy = idea, viewpoint, belief fɪ'lɒsəfi

statesman (plural: statesmen) = an experienced politician, especially one who is respected for making good judgments. 'steɪtsmən

keep somebody in line = keep under control, govern, control kɪp 'sʌmbədi ɪn laɪn

term = word, phrase, expression tɜːm

emergence = appearance, occurrence, development. ɪ'mɜːdʒəns

IQ (intelligence quotient) = a total score derived from several standardized tests designed to assess human intelligence

elite = upper class, superior, first class (a group of people who have a lot of power and influence because they have money, knowledge, or special skills) eɪ'liːt

take responsibility for the = something that it is your job or duty to deal with 'teɪk rɪ'spɒnsə'bɪlɪtɪ fə ðiː

irresponsible = careless, imprudent # responsible ɪrɪ'spɒnsəbəl

mass = majority, main part, largest part mæs

chaos = disorder, confusion, mess #order 'keɪɒs

equal = equivalent, the same, alike #unequal 'iːkwəl

necessarily = essentially, automatically, certainly nesə'serəli

avail one's self of smt = to make use of smt ə'veɪl wʌnz self əv

accomplishment = achievement, triumph, success. ə'kʌmplɪʃmənt

accomplish = achieve, complete, finish, do, undertake, get done, carry out, pull off ə'kʌmplɪʃ

extent = level, range, degree, scope ɪk'stent

foster = promote, encourage, cultivate, #discourage 'fɒstə

to make use of = use, take advantage of, avail of, utilize tu 'meɪk 'juːs əv

competency = capability, ability, skill, #inability 'kɒmpɪtənsɪ

jury = a group of 12 ordinary people who listen to the details of a case in court and decide whether someone is guilty or not 'dʒʊəri

democracy = a situation or system in which everyone is equal and has the right to vote, make decisions etc dɪ'mɒkrəsi

intersubstitutable = capable of being substituted for each other. ɪn 'tɜːsɪ'sʌbstɪtjuːtəbəl

for **specialised** skills, all of which can be learned. In this view, we do not need or want any **institutions** that might lead to **favouring** one group **over** another.

J
Implicit theories of intelligence and of the relationship of intelligence to society perhaps need to be **considered** more carefully than they have been because they often **serve** as **underlying** **presuppositions** for explicit theories and even **experimental** designs that are then taken as scientific contributions. Until **scholars** are able to discuss their implicit theories and thus their **assumptions**, they **are likely to miss the point of** what others are saying when discussing their explicit theories and their data.

specialised = particular, specific, focused, concentrated, #generalised. 'speʃ.əl.aɪzd
Institution = organization, foundation, school. ɪn'stɪ'tju:ʃn
favour sth over sth = choose, support, prefer, promote, benefit, #reject 'feɪvə 'sʌmθɪŋ 'əʊvə 'sʌmθɪŋ
consider = respect, take into account, bear in mind. kən'sɪdə
serve = function, work, perform sɜ:v
underlying = fundamental, basic, core, main ʌndə'laɪɪŋ
presupposition = assumption, supposition, hypothesis. pri:sʌpə'zɪʃn
experimental = trial, new, tentative ɪk,sperɪ'mentl
scholar = professor, intellectual, researcher, specialist 'skɒlə
assumption = hypothesis, theory, supposition, belief ə'sʌmpʃn
likely = probable, possible, expected, prospective, #unlikely 'laɪkli
miss the point of = to not understand the main point of what someone is saying mɪs ðə pɔɪnt əv

READING PASSAGE 2

Saving Bugs To Find New Drugs

Zoologist Ross Piper looks at the potential of insects

in **pharmaceutical** research

A More drugs than you might think are **derived** from, or inspired by, **compounds** found in living things. **Looking** to nature for the **soothing** and **curing** of our **ailments** is nothing new - we have been doing it for tens of thousands of years. You only have to look at other **primates** - such as the capuchin monkeys who **rub** themselves with **toxin-oozing millipedes** to **deter** mosquitoes, or the chimpanzees who use **noxious** forest plants **to rid themselves of intestinal parasites** - to realise that our **ancient ancestors** too probably had a basic **grasp** of medicine.

bug = insect, pest. bʌg

potential = prospect, possibility, capability. pə'tenʃl

pharmaceutical = medicinal, medical, therapeutic, curative. fɑ:mə'sju:tɪkl

derive = originate, come from, develop, obtain, draw from. dɪ'raɪv

compound = complex, mixture, mix, combination. kəm'paʊnd

look to sb for sth = to hope that someone will provide something for you 'lʊk tu sb fə sth

soothing = reducing, alleviating, lessening, easing 'su:ðɪŋ

curing = healing, treating, alleviating, restore to health, #exacerbating 'kjʊəɪŋ

ailment = disease, illness, sickness 'eɪlmənt

primate = a member of the group of animals that includes humans and monkeys 'praɪmət

rub = apply, smear, spread rʌb

toxin = poison, venom, contaminant 'tɒksɪn

ooze = if a thick liquid oozes from something or if something oozes a thick liquid, that liquid flows from it very slowly u:z

millipede (milledepe) = a long thin creature with a very large number of legs 'mɪlɪpi:d

deter = prevent, discourage, put off, #encourage. dɪ'tɜ:

noxious = toxic, lethal, harmful #harmless 'nɒkjəs

to rid themselves of = overcome tu rɪd ðəm'selvz ɒv

intestinal = relating to the intestines (= a long tube through which food travels from the stomach and out of the body while it is being digested) ɪn'testɪnl

parasite = a plant or animal that lives on or in another plant or animal and gets food from it 'pærəsəɪt

ancient = earliest, primeval, prehistoric, age-old, #modern, #contemporary 'eɪnʃənt

ancestor = predecessor, forefather, forebear, #descendant 'ænsesə

grasp = understanding, knowledge, awareness, perception, sense grɑ:sp

B

Pharmaceutical science and chemistry **built on** these ancient **foundations** and **perfected** the **extraction**, **characterisation**, **modification** and testing of these natural products. Then, for a while, modern **pharmaceutical** science moved its focus away from nature and into the **laboratory**, designing chemical compounds **from scratch**. The main cause of this **shift** is that although there are plenty of **promising** chemical **compounds** in nature, finding them is **far from easy**. **Securing sufficient** numbers of the **organism** in **question**, **isolating** and **characterising** the compounds of interest, and producing large quantities of these compounds are all significant **hurdles**.

C

Laboratory-based drug discovery has achieved **varying** levels of success, something which has now **prompted** the development of new **approaches** focusing once again on natural products. With the ability to **mine** **genomes** for useful **compounds**, it is now evident that we have **barely scratched the surface** of nature's **molecular diversity**. This realisation, together with several **looming** health **crises**, such as **antibiotic resistance**, has put **bioprospecting** - the search for useful compounds in nature - **firmly back on the map**.

build on = use your achievements as a base for further development 'bɪd ɒn

foundation = basis, groundwork, base, underpinning faʊn'deɪʃn

perfect = achieve, reach the summit of, top off, improve pə'fekt

extraction = the process of removing or obtaining something from something else. ɪk'strækʃn

characterisation = description, classification, account, categorisation. kær.ək.tə.raɪ'zeɪ.ʃən

modification = alternation, adjustment, variation, change mɒdɪfɪ'keɪʃn

laboratory = a room or building with equipment for doing scientific tests lə'bɒrətɪ

from scratch = from the beginning, square one, from the ground up, initially frəm skɹætʃ

shift = change, move, modification ʃɪft

promising = hopeful, shows potential, #disappointing 'prɒmɪsɪŋ

far from easy = difficult, challenging, tough, hard, complex, #simple, #easy 'fɑː frəm 'iːzi

secure = make safe, safeguard, lock. sɪ'kjʊə

sufficient = enough, adequate, # inadequate sə'fɪʃnt

organism = creature, life form, living thing 'ɔːɡənɪzəm

(smth) in question = smth is being discussed ɪn 'kwɛstʃən

isolate = separate, set apart, segregate, detach, #include 'aɪsələt

characterise = distinguish, exemplify, indicate, set apart 'kær.ək.tə.raɪz

hurdle = obstacle, difficulty, barrier, block. 'hɜːdl

laboratory-based drug = drugs that are synthesized in laboratory lə'bɒr.ə.tər.i-beɪs 'drʌɡ

varying = changing, shifting, altering, changeable, erratic, #constant 'veərɪŋ

prompt = stimulate, urge, encourage, provoke, inspire, motivate, #prevent prɒpt

approach = method, methodology, tactic ə'prəʊtʃ

mine = excavate, dig, extract maɪn

genome = all the genes in one cell of living thing. 'dʒɪ:nəʊm

compound = combination, mixture, complex kəm'paʊnd

barely = hardly, just, only, just about 'beəli

scratch the surface = to deal with only a very small part of a subject or problem 'skrætʃ ðə 'sɜːfɪs

molecular = relating to molecules, which are the simplest units of a chemical substance mə'lekjʊlə

diversity = variety, range, assortment, multiplicity. daɪ'vɜːsɪti

looming = threatening, alarming, frightening, scary, coming up 'luːmɪŋ

crisis (plural: crises) = disaster, catastrophe, trouble, emergency, calamity. 'kraɪsɪs

antibiotic = a drug that is used to kill bacteria and cure infections æntɪbaɪ'ɒtɪk

resistance = refusing, refusal to accept, refusal to go along with, # acceptance rɪ'zɪstəns

bioprospecting = the process of discovery and commercialization of new products based on biological resources. baɪəʊ'prɒspektɪŋ

firmly = strongly, decisively, determinedly, #loosely 'fɜːmli

put smt back on the map = to make a thing, person, or place famous 'put 'sʌmθɪŋ bæk 'ɒn ðə mæp

D

Insects are the **undisputed masters** of the **terrestrial domain**, where they **occupy** every possible **niche**. Consequently, they have a **bewildering array** of **interactions** with other organisms, something which has driven the **evolution** of an **enormous** range of very interesting **compounds** for **defensive** and **offensive** purposes. Their remarkable **diversity exceeds** that of every other group of animals on the planet combined. Yet even though insects are **far and away** the most **diverse** animals **in existence**, their potential as sources of **therapeutic** compounds is yet to be realised.

E

From the tiny **proportion** of insects that have been **investigated**, several **promising** compounds have been **identified**. For example, alloferon, an **antimicrobial** compound produced by **blow fly larvae**, is used as an **antiviral** and **antitumor agent** in South Korea and Russia. The **larvae** of a few other insect **species** are being investigated for the **potent antimicrobial** compounds they produce. Meanwhile, a compound from the **venom** of the **wasp** *Polybia paulista* has potential in cancer treatment.

F

Why is it that insects have received **relatively** little attention in **bioprospecting**? Firstly, there are so many insects that, without some **manner** of targeted approach, investigating this huge variety of species is a **daunting** task. Secondly, insects are generally very small, and the **glands** inside them that **secrete** potentially useful compounds are smaller still. This can make it difficult to **obtain** sufficient quantities of the compound for **subsequent** testing. Thirdly, although we consider insects to be everywhere, the **reality** of this **ubiquity** is

undisputed= unquestionable, undeniable, undoubted, acknowledged, #questionable. *ʌndɪˈspjuːtɪd*
master = ruler, owner, chief *ˈmɑːstə*
terrestrial = earthly, underground, relating to the earth. *trɪˈrestriəl*

domain= area, field, territory. *dəʊˈmeɪn*
occupy= inhabit, live in, reside in, dominate, #vacate *ˈɒkjʊpaɪ*
niche = place, position, area. *nɪʃ*
bewildering = confusing, baffling, puzzling perplexing, mystifying, #clear *biˈwɪldərɪŋ*
an array of = a wide range of, a number of, many, various, quite a lot *ən əˈreɪ ɒv*
interaction= communication, collaboration relations, connection. *ɪntəˈrækʃn*
evolution=development, growth, progress, advancement, #regression *iːvəˈluːʃn*
enormous = huge, vast, giant, massive, gigantic, #tiny. *ɪˈnɔːməs*
defensive= self-protective, defending, shielding, fortified *dɪˈfensɪv*
offensive= attacking, violent, aggressive *əˈfensɪv*
exceed = surpass, go over, go beyond, go above. *ɪkˈsiːd*
far and away = used to say that something is much better, worse etc than anything else *ˈfɑːr ənd əˈweɪ*
in existence = existing, extant, #lost *ɪn ɪgˈzɪstəns*
therapeutic = healing, curative, #preventive *θerəˈpijuːtɪk*

proportion= amount, quantity, percentage *prəˈpɔːʃn*
investigate= look into something, explore, probe. *ɪnˈvestɪɡeɪt*

identified = recognized, known, acknowledged *aɪˈdentɪfaɪd*
antimicrobial= able to destroy harmful microbes which are small living things that can cause disease) *æn.ti.maɪˈkreɪ.bi.əl*

blow fly = a fly that lays its eggs on meat or wounds *ˈbləʊ flaɪ*

larvae= young insect, worms, maggots *ˈlɑːviː*
antiviral = an antiviral drug or treatment is used to cure an infection or disease caused by a virus. *æntiˈvaɪrəl*
antitumor = inhibiting the growth of a tumor or tumors *ˈænti-ˈtjuːmə*

agent = a chemical or substance that is used for a particular purpose or that has a particular effect *ˈeɪdʒənt*
potent= strong, powerful, effective, #weak *ˈpəʊtnt*
venom= poison, toxin, #antidote *ˈvenəm*
wasp = bee, large bee *wɒsp*

relatively = comparatively, quite, somewhat *ˈrelatɪvli*
bioprospecting = the scientific study of plants and other living things in order to discover new drugs that can be used as medicines *baɪəʊˈprɒspekʃɪŋ*
manner = way, style, method, means *ˈmænə*
daunting= difficult, tough. *ˈdɔːntɪŋ*
gland = an organ of the body or of a plant that secretes liquid chemicals that have various purposes *ɡlænd*
secrete = release, produce, ooze, #absorb. *sɪˈkriːt*
obtain =gain, find, acquire, achieve, get hold of *əbˈteɪn*
subsequent = following, successive, later *ˈsʌbsɪkwənt*
reality = real life, actuality, the real world *riˈælɪti*
ubiquity= popular, common, all over the place *juːˈbɪkwɪti*

vast numbers of a few extremely common species. Many insect species are infrequently **encountered** and very difficult to **rear** in **captivity**, which, again, can leave us with **insufficient** material to work with.

G

My colleagues and I at Aberystwyth University in the UK have developed an **approach** in which we use our knowledge of **ecology** as a guide to **target** our efforts.

The **creatures** that particularly interest us are the many insects that **secrete** powerful **poison** for **subduing** **prey** and keeping it fresh for future **consumption**. There are even more insects that are masters of **exploiting** **filthy** **habitats**, such as **faces** and **carcasses**, where they are regularly challenged by thousands of **microorganisms**. These insects have many antimicrobial compounds for **dealing with** **pathogenic** bacteria and fungi, suggesting that there is certainly potential to find many compounds that can serve as or **inspire** new antibiotics.

H

Although natural history knowledge **points us in the right direction**, it doesn't solve the problems **associated with** obtaining useful compounds from insects.

Fortunately, it is now possible to **snip out** the **stretches** of the insect's DNA that carry the codes for the interesting compounds and **insert** them into **cell lines** that allow larger quantities to be produced. And although the road from **isolating** and **characterising** compounds with **desirable** qualities to developing a **commercial** product is very long and full of **pitfalls**, the variety of successful animal-**derived** **pharmaceuticals** on the market demonstrates there is a **precedent** here that is worth exploring. With every bit of **wilderness** that disappears,

vast = massive, considerable, limitless, #small vɑːst
encounter = meet, see, come across, run into, come upon, stumble upon, #avoided ɪnˈkaʊntə
rear = raise, nurture, look after, take care of, #neglect nɪə
captivity = cage, prison, custody, #freedom kæpˈtɪvɪti
insufficient = not enough, inadequate, deficient, in short supply, lacking, #sufficient ɪnsəˈfɪʃnt

approach = method, methodology, technique, procedure, tactic əˈprəʊtʃ
ecology = ecosystem, bionetwork, biology, environmental science, natural science iːˈkɒlədʒi
target = direct, aim, point, focus ˈtɑːɡɪt
creature = animal, living being, living thing ˈkriːtʃə
secrete = release, produce, ooze sɪˈkriːt
poison = toxin, venom, contagion, toxic substance ˈpɔɪzən
subdue = defeat, control səbˈdjuː
prey = quarry, victim, target #predator, #hunter. preɪ
consumption = feeding, use, eating. kənˈsʌmpʃən
exploit = use, utilize, make use of, take advantage of, make the most of, #waste ɪkˈsplɔɪt
filthy = dirty, muddy, messy, grubby, #clean ˈfɪlði
habitat = living environment, surrounding. ˈhæbɪtæt
faces = mine = the part of a mine from which coal, stone, etc is cut ˈfeɪsɪz
carcass = corpse, cadaver, dead body ˈkɑːkəs
microorganism = germ, virus, bacteria maɪkrəʊˈɔːɡəˌnɪzəm
deal with = solve, tackle, cope with, handle diːl wɪð
pathogenic = able to cause disease. ˈpæθədʒən
inspire = motivate, encourage, stimulate ɪnˈspaɪə

points someone in the right direction = to give one advice or information that helps guide them toward a desired outcome or course of action pɔɪnts ˈsʌmwʌn ɪn ðə ˈraɪt dɪˈrekʃən
associate with = relate to, accompany, mix, consort with əˈsəʊsɪeɪt wɪð
snip out = extract, cut snɪp ˈaʊt
stretch = part, section, bit streɪtʃ
insert = add, include, make the addition of, #extract ɪnˈsɜːt
cell line = a cell culture developed from a single cell and therefore consisting of cells with a uniform genetic makeup. sel laɪn
isolate = separate, detach, cut off, set apart, #include ˈaɪsəleɪt
characterise = distinguish, typify, exemplify, set apart ˈkær.ək.tə.raɪz
desirable = wanted, needed, necessary, required, #undesirable dɪˈzaɪərəbəl
commercial = profitable, trade, marketable, saleable, profit-making, #charitable kəmˈɜːʃjəl
pitfall = difficulty, trap ˈpɪtfɔːl
derive = originate, develop, come from dɪˈraɪv
precedent = something of the same type that has happened or existed before ˈpreɪsɪdənt
wilderness = a large area of land that has never been developed or farmed ˈwɪldənəs

we **deprive** ourselves of potential medicines. As much as I'd love to help develop a **groundbreaking insect-derived** medicine, my main motivation for looking at insects in this way is **conservation**. I **sincerely** believe that all species, however small and **seemingly** insignificant, have a right to exist **for their own sake**. If we can **shine a light on** the darker **recesses** of nature's medicine **cabinet**, exploring the useful chemistry of the most **diverse** animals on the planet, I believe we can make people think differently about the value of nature.

deprive of = take, remove, withdraw, take away, #provide
dɪˈpraɪv ɒv
groundbreaking= revolutionary, pioneering, innovative,
leading-edge ˈgraʊndˌbreɪkɪŋ
conservation= preservation, protection, maintenance,
#destruction kɒnsəˈveɪʃən
sincerely = genuinely, truthfully, seriously, earnestly,
really, from the bottom of one's heart, #insincerely sɪnˈsɪəli
seemingly = apparently, on the face of it, superficially
ˈsiːmɪŋli
for one's own sake = in order to help or bring advantage
to someone (=for one's good or benefit) fə wʌnz əʊn seɪk
shine a light = make it clear, brighten, give an explanation,
investigate, clarify ʃaɪn ə laɪt
the recesses of = a secret or hidden place ðə ɪˈsesɪz ɒv
cabinet= piece of furniture with shelves, cupboards, or
drawers, used for storing or showing things ˈkæbɪnət

READING PASSAGE 3

Virtually every child, **the world over**, plays. The **drive** to play is so **intense** that children will do so in any **circumstances**, for instance when they have no real toys, or when parents do not actively **encourage** the behavior. **In the eyes of** a young child, running, **pretending**, and building are fun. Researchers and educators know that these playful activities benefit the development of the whole child across social, **cognitive**, physical, and emotional **domains**. **Indeed**, play is such an **instrumental component** to healthy child development that the United Nations High Commission on Human Rights (1989) recognised play as a **fundamental** right of every child.

Yet, while experts continue to **expound** a powerful argument for the importance of play in children's lives, the actual time children spend playing continues to decrease. Today, children play eight hours less each week than their **counterparts** did two decades ago (Elkind 2008). Under pressure of rising academic **standards**, play is being replaced by test preparation in **kindergartens** and **grade schools**, and

virtually = almost, nearly, practically 'vɜːtʃuəli
the world over = everywhere in the world ðə 'wɜːld 'əʊvə
drive = urge, desire, need, instinct, passion draɪv
intense = strong, powerful, forceful, deep, passionate. ɪn'tens
circumstance = situation, context, incident, case, event 'sɜːkəmstəns
encourage = inspire, boost, urge, assist, promote, #discourage ɪn'kʌrɪdʒ
in the eyes of = in the opinion of, in the view of ɪn ði aɪz
pretend = imagine, fantasize, not real prɪ'tend
cognitive = perceptive, rational, thinking, thought, mental, intellectual, reasoning. 'kɒgnətɪv
domain = area, field. dəʊ'meɪn
indeed = actually, in reality, in fact, as a matter of fact, in actual fact, in truth ɪn'diːd
instrumental = influential, contributory, helpful ɪnstru'mentl
component = part, element, piece, factor, section, #whole kəm'pəʊnənt
fundamental = basic, essential, primary, necessary, vital, #secondary fʌndə'mentl
expound = explain, develop, expand, give further details about ɪk'spaʊnd
counterpart = colleague, corresponding person 'kaʊntəpɑːt
kindergarten = a school for very young children = nursery school, playschool, pre-school playgroup 'kɪndəɡɑːtən
grade school = elementary school, primary school greɪd skuːl

parents who **aim** to **give** their **preschoolers** a **leg up** are led to believe that flashcards and educational 'toys' are the **path** to success. Our society has created a false **dichotomy** between play and learning.

Through play, children learn to **regulate** their behavior, **lay** the **foundations** for later learning in science and mathematics, **figure out** the complex **negotiations** of social relationships, build a **repertoire** of creative problem-solving skills, and so much more. There is also an important role for adults in guiding children through playful learning opportunities.

Full **consensus** on a formal definition of play continues to **elude** the researchers and **theorists** who study it. Definitions **range from discrete** descriptions of various types of play such as physical, construction, language, or **symbolic** play (Miller & Almon 2009), to lists of **broad criteria**, based on observations and attitudes, that are meant to **capture** the **essence** of all play behaviors (e.g. Rubin et al. 1983).

A majority of the **contemporary** definitions of play focus on several key **criteria**. The founder of the National Institute for Play, Stuart Brown, has described play as 'anything that **spontaneously** is done **for its own sake**'. More **specifically**, he says it 'appears **purposeless**, produces **pleasure** and joy, [and] leads one to the next stage of **mastery**' (as **quoted** in Tippett 2008). Similarly, Miller and Almon (2009) say that play includes 'activities that are freely chosen and directed by children and **arise** from **intrinsic** motivation'. Often, play is defined along a **continuum** as more or less playful using the following **set of** behavioral and **dispositional** criteria (e.g.

aim = plan, intend, try, want, endeavor, aspire, strive for
give sb a leg up = to help someone to improve their situation, especially at work
preschooler = under-five, youngster, child
path = way, route, direction
dichotomy = contrast, opposition

regulate = control, adjust, set, standardize
lay = place, put, set, pick up
foundation = basis, base, footing, underpinning
figure out = work out, understand, discover, solve, realise
negotiation = cooperation, compromise, intervention, discussion, finding the middle ground, #confrontation
repertoire = range, list, group, series

consensus = agreement, harmony, accord
elude = escape, avoid
theorist = philosopher, theoretician, thinker, truth-seeker, #realist
range from = vary from, differ from, diverge from
discrete = separate, distinct, detached, isolated, unconnected
symbolic = representative, figurative, emblematic, representational
broad = wide-ranging, wide, general, large, #restricted, #narrow
criterion – criteria (plural) = principle, norm, standard, measure, condition
capture = catch, seize, get, acquire, obtain
essence = spirit, core, principle, fundamental nature

contemporary = modern, current, present-day, modern-day, up-to-date, existing, #old
criteria = standards, principles, measures
spontaneously = naturally, freely, unexpectedly, unprompted, all of a sudden, #deliberately
for one's own sake = in order to help or bring advantage to someone
specifically = particularly, specially, purposely, precisely
purposeless = senseless, meaningless
pleasure = amusement, recreation, leisure, relaxation, happiness, enjoyment, satisfaction, #displeasure
mastery = proficiency, knowledge, ability, capability
quoted = repeated, refer to, recited, mentioned
arise from = result from, be the result of, be caused by, stem from, come from
intrinsic = natural, innate, genuine, fundamental, basic, inherent
continuum = range, band, field
the set of smt = a group of things that belong together or are used together
dispositional = related to personality, character, instinct

Rubin et al. 1983): Play is **pleasurable**: Children must enjoy the activity or it is not play. It is intrinsically motivated: Children **engage in** play simply for the **satisfaction** the behavior itself brings. It has no **extrinsically** motivated function or goal. Play is process **oriented**: When children play, the means are more important than the ends. It is freely chosen, spontaneous and voluntary. If a child is pressured, they will likely not think of the activity as play. Play is actively engaged: Players must be physically and/or mentally involved in the activity. Play is **non-literal**. It involves **make-believe**.

According to this view, children's playful behaviors can **range** in degree from 0% to 100% playful. Rubin and colleagues did not **assign** greater weight to any one **dimension** in **determining** playfulness; however, other researchers have suggested that process **orientation** and a **lack** of **obvious** functional purpose may be the most important **aspects** of play (e.g. Pellegrini 2009).

From the **perspective** of a continuum, play can thus **blend** with other **motives** and attitudes that are less playful, such as work. Unlike play, work is typically not viewed as enjoyable and it is extrinsically motivated (i.e. it is goal oriented). Researcher Joan Goodman (1994) suggested that **hybrid** forms of work and play are not a **detriment** to learning; rather, they can provide **optimal** contexts for learning. For example, a child may be **engaged in** a difficult, goal-directed activity set up by their teacher, but they may still be actively engaged and intrinsically motivated. At this **mid-point** between play and work, the child's motivation, **coupled with** guidance from an adult, can create **robust** opportunities for playful learning. **Critically**, recent research supports the idea that adults can **facilitate** children's learning while **maintaining** a playful **approach** in **interactions** known as

pleasurable = satisfying, enjoyable, good fun, pleasing, pleasant 'pleʒərəbəl

engage in = participate in, take part in, do, involve in in'geɪdʒ ɪn

satisfaction=fulfilment, enjoyment, pleasure, contentment, enjoyment, #dissatisfaction. sætsɪs'fækʃn

extrinsically = coming from outside or not directly relating to something eks'trɪnsɪkəli

oriented = directed towards or interested in something 'ɔ:riəntɪd

literal = factual, truthful, honest, exact #fictional 'lɪtərəl
make-believe = fantasy, pretense, role-playing, #reality 'meɪk bɪli:v

range = vary, alternate, fluctuate, extend reɪndʒ

assign = allocate, select and give a responsibility ə'saɪn

dimension = aspect, element, facet, feature, factor, component dɪ'menʃn

determine = identify, find out, specify dɪ'tɜ:mɪn

process orientation = emphasize or focus on process, system or procedure 'prəʊsɪs ɔ:'rɪən'teɪʃn

lack = dearth, shortage, deficiency, absence, insufficiency, #abundance #surplus læk

obvious = clear, noticeable, apparent, recognizable, #obscure 'ɒbvɪəs

aspect = feature, facet, part. 'æspekt

perspective = view, viewpoint, thought, point of view pə'spektɪv

blend = mix, combine, merge. blend

motive = reason, purpose, motivation, intention, drive, #deterrent 'məʊtɪv

hybrid = cross, mixture, mix, fusion. 'haɪbrɪd

detriment = disadvantage, harm, damage, #advantage, #benefit 'detrɪmənt

optimal = finest, prime, most favorable, best possible, most advantageous, #worst. 'ɒptɪməl

engage in= involve, take part 'ɒptɪməl

mid-point = a point half the distance along something such as a line 'mɪd.pɔɪnt

couple with = together with, in addition to, as well as 'kʌpl wɪð

robust = healthy, vigorous, strong, forceful, #weak rəʊ'bʌst

critically = significantly, vitally, importantly, essentially, crucially, seriously, #insignificantly 'krɪtɪkəli

facilitate = aid, assist, accelerate, make easy, make possible, smooth the progress of, #impede. fə'sɪlɪteɪt

maintain = keep, sustain, conserve, preserve, #destroy meɪn'teɪn

approach = method, methodology, tactic. ə'prəʊtʃ

interaction = communication, contact, collaboration ɪntə'rækʃn

'guided play' (Fisher et al. 2011). The adult's **role** in play **varies** as a function of their educational goals and the child's developmental level (Hirsch-Pasek et al. 2009).

Guided play takes two forms. At a very basic level, adults can **enrich** the child's environment by providing objects or experiences that **promote** aspects of a **curriculum**. In the more direct form of guided play, parents or other adults can support children's play by joining in the fun as a **co-player**, raising **thoughtful** questions, **commenting** on children's **discoveries**, or encouraging further **exploration** or new **facets** to the child's activity. Although playful learning can be **somewhat** structured, it must also be child-centered (Nicolopolou et al. 2006). Play should **stem from** the child's own **desire**.

Both free and guided play are **essential elements** in a child-centered approach to playful learning. Intrinsically motivated free play provides the child with true **autonomy**, while guided play is an **avenue** through which parents and **educators** can provide more targeted learning experiences. In either case, play should be actively engaged, it should be **predominantly** child-directed, and it must be fun.

role = function, responsibility, task, part character *rəʊl*
vary = differ, diverge, be different, alter, fluctuate *'veəri*

enrich = enhance, augment, improve. *ɪn'ri:tʃ*
promote = support, foster, encourage, help, #suppress *prə'məʊt*
curriculum = set of courses, program of study, syllabus *kə'rɪkjʊləm*
co-player = teammate, ally, partner fellow player *'kəʊ-pleɪ.ər*
thoughtful = thorough, deep, considerate *'θɔ:tfəl*
comment = remark, mention, state, point out *'kɒment*
discovery = exploration, breakthrough, invention, finding *dɪ'skʌvəri*
exploration = discovery, adventure, searching. *eksplə'reɪʃn*
facet = aspect, feature, component, factor, side, surface *'fæsɪt*
somewhat = partly, slightly, to some extent, to a certain degree *'sʌmwɒt*
centered = focused, concentrated, highlighted, examined, targeted *'sentəd*
stem from sth = arise from, originate from, come from, derive from, develop from, be a result of, be caused by *stem frəm 'sʌmθɪŋ*
desire = wish, want, longing, craving *dɪ'zaɪə*

essential = vital, fundamental basic elemental crucial important unnecessary *ɪ'senʃl*
element = component, factor, part *'elɪmənt*
autonomy = independence, self-rule, self-government, #dependence *ɔ:'tɒnəmi*
avenue = opportunity, possibility, chance *'ævenju:*
educator = teacher, instructor, coach, mentor, educationalist *'edʒʊkeɪtə*
predominantly = mainly, mostly, largely, principally, for the most part partially *prɪ'dɒmɪnəntli*

TEST 4

READING PASSAGE 1

The Secret of Staying Young

P*heidole dentata*, a **native** ant of the south-eastern U.S.,

isn't **immortal**. But scientists have **found** that it doesn't seem to show any signs of **aging**. Old worker ants can do everything just as well as the **youngsters**, and their brains appear just as **sharp**. 'We get a picture that these ants really don't **decline**,' says Ysabel Giraldo, who studied the ants for her doctoral **thesis** at Boston University. Such age-**defying** **feats** are **rare** in the animal kingdom. **Naked mole** rats can live for almost 30 years and **stay fit** for nearly their entire lives. They can still **reproduce** even when old, and they never get **cancer**. But the **vast majority** of animals **deteriorate** with age just like people do. Like the naked mole rat, ants are social **creatures** that usually live in highly organised **colonies**. 'It's this social **complexity** that makes

native = resident, local, aboriginal #foreign 'neɪtɪv
ant = a small insect that lives in large groups ænt
immortal = eternal, undying, endless. ɪ'mɔ:tl
aging = the process of growing old 'eɪdʒɪŋ
youngster = younger ants 'jʌŋstə
sharp = intelligent #dull #stupid ʃɑ:p
decline = fall, decrease, weaken #increase dɪ'klaɪn
thesis = long piece of writing that you do as part of an advanced university degree such as an MA or a PhD 'θɪ:sts
defying = disobey, break a law, flout f#obey dɪ'faɪɪŋ
feat = achievement, accomplishment fi:t
rare = uncommon, unusual, occasional #common reə
naked = nude, unclothed, stripped, undressed
#covered 'neɪkɪd
mole = a small dark furry animal which is almost blind. moles usually live under the ground. məʊl
stay fit = keep fit, keep in shape steɪ fi:t
reproduce = breed, give birth to, procreate rɪ:prə'dju:s
cancer = a very serious disease in which cells in one part of the body start to grow in a way that is not normal 'kænsə
vast = huge, enormous, immense, massive #small vɑ:st
majority = popular, common #minority mə'dʒɔ:rtɪ
deteriorate = decline, worsen, weaken dɪ'tɪəriəreɪt
creature = animal, insect, living thing 'kri:tʃə
colonies = group, association, society 'kɒlənɪz
complexity = intricacy, complication #simplicity kəm'pleksɪti

P. dentata useful for studying aging in people,' says Giraldo, now at the California Institute of Technology. Humans are also highly social, a **trait** that has been connected to healthier aging. **By contrast**, most animal studies of aging use mice, worms or **fruit flies**, which all lead much more **isolated** lives. In the **lab**, *P. dentata* worker ants **typically** live for around 140 days. Giraldo focused on ants at four age **ranges**: 20 to 22 days, 45 to 47 days, 95 to 97 days and 120 to 122 days. Unlike all **previous** studies, which only **estimated** how old the ants were, her work **tracked** the ants from the time the **pupae** became adults, so she knew their exact ages. Then she put them through a range of tests.

Giraldo **watched** how well the ants took care of the young of the **colony**, recording how often each ant **attended to**, **carried** and fed them. She compared how well 20-day-old and 95-day-old ants followed the **telltale scent** that the insects usually leave to mark a **trail** to food. She tested how ants responded to light and also measured how active they were by counting how often ants in a small dish walked across a line. And she experimented with how ants **react to** live **prey**: a **tethered** fruit fly. Giraldo expected the older ants to perform **poorly** in all these tasks. But the elderly insects were all good **caretakers** and trail-followers-the 95-day-old ants could track the scent even longer than their younger **counterparts**. They all responded to light well, and the older ants were more active. And when it came to reacting to prey, the older ants attacked the poor fruit fly just as **aggressively** as the young ones did, **flaring** their **mandibles** or pulling at the fly's legs.

Then Giraldo compared the brains of 20-day-old and 95-day-old ants, **identifying** any cells that were close to death. She saw no major differences with age, nor was there any difference in the location of the dying cells, showing that age didn't seem to affect **specific** brain **functions**.

trait= attribute, character, feature, personality **trait**
by contrast = alternatively, on the other hand, as opposed to, different
fruit fly= a small fly that eats fruit or decaying plants
isolated= separated, lonely, solitary, friendless
lab= laboratory, workroom, test center
typically= commonly, usually, normally.
range = variety, series, collection
estimate = assess, value, appraise
track= follow, chase, pursue
pupa= an insect at the stage before it becomes adult, when it is protected by a special cover

watch = observe, survey, examine
colony= a group of animals or plants of the same type that are living together
attend to sb/sth= to deal with business or personal matters
carry = to be pregnant with a child
telltale = revealing, divulging, indicative
scent= the smell of a particular animal or person that some other animals can follow
trail = path, line, way
react to= respond, alter, retort
prey = an animal that is hunted and eaten by another animal
tether = tie, fasten, secure, rope
poorly = disappointingly, badly
caretaker= someone who looks after other people, especially a teacher, parent, nurse etc
counterpart = equivalent, colleague, equal
aggressively= violently, hostilely, forcefully
flare = if a person or animal flares their nostrils (=the openings at the end of the nose), their nostrils become wider because they are angry
mandible= jaw, jawbone, mouth, mouthpiece

identify= find, recognize, classify

specific = particular, certain, exclusive
function= purpose, role, job

Ants and other insects have **structures** in their brains called mushroom bodies, which are important for **processing** information, learning and memory. She also wanted to see if aging affects the **density** of **synaptic complexes** within these structures-**regions** where **neurons** come together. Again, the answer was no. What was more, the old ants didn't experience any **drop** in the levels of either **serotonin** or **dopamine**-brain chemicals whose **decline** often **coincides with** aging. In humans, for example, a **decrease** in serotonin has been **linked to** Alzheimer's disease.

'This is the first time anyone has **looked at** both behavioral and neural changes in these ants so **thoroughly**,' says Giraldo, who recently **published** the **findings** in the *Proceedings of the Royal Society B*. Scientists have looked at some similar aspects in bees, but the results of recent bee studies were **mixed**-some studies showed age-related declines, which **biologists** call **senescence**, and others didn't. 'For now, the **study raises** more questions than it answers,' Giraldo says, 'including how *P. dentata* **stays in such good shape**.'

Also, if the ants don't **deteriorate** with age, why do they die at all? Out in the wild, the ants probably don't live for a full 140 days thanks to **predators**, disease and just being in an environment that's much **harsher** than the comforts of the lab. 'The lucky ants that do live into old age may **suffer a steep** decline just before dying,' Giraldo says, but she can't say **for sure** because her study wasn't designed to follow an ant's final moments.

'It will be important to **extend** these findings to other **species** of social **insects**,' says Gene E. Robinson, an **entomologist** at the University of Illinois at Urbana-Champaign. This ant

structure = constitute, construct, form 'strʌktʃə
process = handle, deal with, manage 'prəʊses
density= intensity, concentration, extent, degree 'densɪti
synaptic (adj) = related to the place where nerve cells meet, especially in the brain 'sainæps
complex = an emotional problem in which someone is unnecessarily anxious about something or thinks too much about something works, systems 'kɒmpleks
region= area, zone, place 'riːdʒən
neuron = a type of cell that makes up the nervous system and sends messages to other parts of the body or the brain 'njʊərɒn
drop = reduction, decrease, decline drɒp
serotonin = a chemical in the body that helps carry messages from the brain and is believed to make you feel happy sɪrə'təʊnɪn
dopamine = a hormone (= chemical substance) that is made naturally in the body and may also be given as a drug 'dəʊpəmiːn
coincide with = to happen at the same time as something else, especially by chance kəʊɪn'saɪd wɪð
link to = connect, relate, combine #separate 'lɪŋk tuː

look at = search, study, investigate, explore 'lʊk æt
thoroughly= comprehensively, completely, carefully, meticulously 'θʌrəli
publish = issue, print, distribute 'pʌblɪʃ
finding = discovery, conclusion, result 'faɪndɪŋ
proceeding = an event or a series of things that happen prə'siːdɪŋ
mixed = varied, diverse, assorted mɪksɪd
biologist= a scientist who studies or works in biology baɪ'ɒlədʒɪst
senescence = becoming old and showing the effects of getting older sɪ'nes.əns
raise = produce, create, cause reɪz
stay in good shape = keep fit, get fit, keep in shape 'steɪ ɪn gʊd ʃeɪp

deteriorate = get worse, go down, degenerate, decline dɪ'tɪəriəreɪt
predator= an animal that kills and eats other animals #prey 'predətə
harsh=severe = harsh conditions are difficult to live in and very uncomfortable hɑːʃ
suffer = experience, undergo, bear, endure 'sʌfə
steep= dramatic, sharp, extreme stiːp
for sure = certainly, definitely fə'ʃʊə

extend= spread, broaden, expand ɪk'stend
insect = bug, pest, creature 'ɪnsekt
entomologist= a scientist who studies insects ɛntə'mɒlədʒɪst

might be **unique**, or it might **represent** a **broad** pattern among other social bugs with possible **clues** to the science of aging in larger animals. Either way, it seems that for these ants, age really doesn't matter.

READING PASSAGE 2

Why Zoos Are Good

Scientist David Hone **makes the case for** zoos

A

In my view, it is perfectly possible for many **species** of animals living in zoos or **wildlife** parks to have a quality of life as high as, or higher than, in the wild. Animals in good zoos get a varied and high-quality **diet** with all the **supplements required**, and any **illnesses** they might have will be **treated**. Their movement might be **somewhat restricted**, but they have a safe environment in which to live, and they are **spared bullying** and social **ostracism** by others of their kind. They do not **suffer from the threat** or stress of **predators**, or the **irritation** and pain of **parasites** or injuries. The average **captive** animal will have a greater **life expectancy** compared

make a case for sth = to argue that something is the best thing to do, giving your reasons 'meɪk ə keɪs fə sth

species = type, kind, sort, class, group 'spi:ʃi:z

wildlife = nature, natural world, environment 'waɪldlaɪf

varied = diverse, various, mixed #limited 'veəriəd

diet = food and drink, eating habits, pattern of eating. 'daɪət

supplement = addition, complement, enhancement

#deduction 'sʌplɪmənt

require = need, want, involve rɪ'kwaɪə

treat = cure, care for, heal, remedy tri:t

somewhat = to some extent, to a certain degree, rather 'sʌmwʌt

restrict = limit, prohibit, inhibit rɪ'strɪkt

spare = to prevent someone from having to experience something unpleasant speə

bully = frighten, intimidate, harass 'bʊli

ostracism = isolation, exclusion, keeping out #inclusion 'ɒstrəsɪzəm

suffer from = undergo, bear, endure, experience, put up with 'sʌfə frəm

threat = danger, risk, menace, hazard θreɪt

predator = an animal that kills and eats other animals 'predətə

irritation = nuisance, , annoyance (the feeling of being annoyed) ɪrɪ'teɪʃən

parasite = a small animal or plant that lives on or inside another animal or plant and gets its food from it 'pærəsart

captive = caged, imprisoned, in prison #free 'kæptɪv

life expectancy = lifespan, lifetime 'laɪf ɪk'spektənsi

with its wild **counterpart**, and will not die of drought, of **starvation** or in the **jaws** of a predator. A lot of very **nasty** things happen to truly 'wild' animals that simply don't happen in good zoos, and to view a life that is 'free' as one that is automatically 'good' is, I think, an error. Furthermore, zoos **serve** several key purposes.

B

Firstly, zoos **aid conservation**. **Colossal** numbers of species are becoming **extinct** across the world, and many more are increasingly **threatened** and therefore **risk extinction**. Moreover, some of these **collapses** have been **sudden**, **dramatic** and unexpected, or were simply discovered very late in the day. A species protected in **captivity** can be **bred up** to provide a **reservoir** population against a **population crash** or extinction in the wild. A good number of species only exist in captivity, with many of these living in zoos. Still more only exist in the wild because they have been **reintroduced** from zoos, or have wild populations that have been **boosted** by captive bred animals. Without these efforts there would be fewer species alive today. Although reintroduction successes are **few and far between**, the numbers are increasing, and the very fact that species have been saved or reintroduced as a result of captive breeding **proves** the value of such **initiatives**.

C

Zoos also provide education. Many children and adults, especially those in cities, will never see a wild animal **beyond** a fox or pigeon. While it is true that television **documentaries** are becoming ever more **detailed** and **impressive**, and many natural history **specimens** are **on display** in museums, there really is nothing to compare with seeing a living **creature in the flesh**, hearing it, smelling it, watching what it does and having the time to **absorb** details. That alone will bring a greater understanding and **perspective** to many, and hopefully

counterpart = colleague, equal, equivalent 'kauntəpɑ:t
starvation = hunger, famine, food shortage, lack of food stɑ:'veɪʃn
jaws= the mouth of a person or animal, especially a dangerous animal dʒɔ:z
nasty= dangerous, painful, horrible #slight 'nɑ:sti
serve = perform, do, achieve, fulfill sɜ:v

aid = support, help, encourage eɪd
conservation= preservation, protection, maintenance kɒnsə'veɪʃn
colossal= huge, massive, gigantic, enormous #tiny kə'ləsl
extinct = inexistent, vanished, defunct, dead ɪk'stɪŋt
threaten = frighten, intimidate, warn 'θreɪn
risk = suffer from, endanger, jeopardize. rɪsk
extinction = disappearance, loss, extermination, death ɪk'stɪŋkʃn
collapse = illness, injury, breakdown kə'læps
sudden = unexpected, rapid, quick #gradually 'sʌdn
dramatic = remarkable, impressive, extraordinary drə'mætrɪk
captivity = when a person or animal is kept in a prison, cage #freedom kæp'tɪvɪti
breed = have babies, reproduce, procreate, propagate brɪ:d
reservoir= a large amount of something that is available and has not yet been used 'rezəvwa:
population crash = a sudden decline in the numbers of individual members in a population pɒpjʊ'leɪʃn kræʃ
reintroduce = restore, reinstate, bring back rɪ'ɪntro'dju:s
boost = increase, improve, enhance #reduce bu:st
be few and far between = to be rare bɪ fju: ənd 'fɑ: bɪ'twi:n
prove= show, demonstrate, confirm pru:v
initiative= plan, program, project, scheme, idea ɪ'nɪʃetɪv

beyond= other than, beside bɪ'jɒnd
documentary = film, movie, biography dɒkjʊ'mentəri
detailed = thorough, comprehensive, complete di'teɪld
impressive = remarkable, extraordinary, exciting ɪm'presɪv
#unimpressive ɪm'presɪv
specimen= sample, example, case 'spesɪmɪn
on display = something that is on display is in a public place where people can look at it (= on show) 'ɒn dɪ'spleɪ
creature= animal, living thing, being 'kri:tʃə
in the flesh = in person, in real life, in actual life ɪn ðə fletʃ
absorb = learn, understand, get əb'zɔ:b
perspective= aspect, viewpoint, perception pə'spektɪv

give them a greater **appreciation** for wildlife, conservation efforts and how they can **contribute**.

D

In addition to this, there is also the education that can **take place** in zoos through signs, talks and presentations which directly **communicate** information to visitors about the animals they are seeing and their place in the world. This was an area where zoos used to be **lacking**, but they are now increasingly **sophisticated** in their communication and **outreach** work. Many zoos also work directly to educate conservation workers in other countries, or send their animal **keepers** abroad to contribute their knowledge and skills to those working in zoos and **reserves**, **thereby** helping to improve conditions and reintroductions all over the world.

E

Zoos also play a key role in research. If we are to save wild species and **restore** and repair **ecosystems** we need to know about how key species live, act and react. Being able to **undertake** research on animals in zoos where there is less risk and fewer **variables** means real changes can be effected on wild populations. Finding out about, for example, the **oestrus cycle** of an animal or its **breeding rate** helps us manage wild populations.

Procedures such as **capturing** and moving at-risk or dangerous individuals are **bolstered** by knowledge gained in zoos about **doses** for **anaesthetics**, and by experience in **handling** and **transporting** animals. This can make a real difference to **conservation** efforts and to the **reduction** of human-animal **conflicts**, and can provide a knowledge **base** for helping with the increasing threats of **habitat destruction** and other problems

F

In conclusion, considering the many **ongoing global** threats to the environment, it is hard for me to see zoos as anything other than **essential** to the **long-term survival** of **numerous** species. They are **vital** not just in **terms of** protecting animals, but as a means of learning

appreciation = thankfulness, gratitude, recognition, gratefulness əˌpriːʃiˈeɪʃn
contribute = support, aid, impact, participate kənˈtrɪbjʊːt

take place = happen, occur ˈteɪk ˈpleɪs
communicate = reveal, transmit, convey kəˈmjuːnɪkeɪt
lacking = absent, missing #present ˈlækɪŋ
sophisticated = complicated, advanced, complex, detailed səˈfɪstɪkeɪtɪd
outreach = when help, advice, or other services are provided for people who would not otherwise get these services easily ˈaʊtriːtʃ
keeper = guard, caretaker, ranger ˈkiːpə
reverse = an area of land where wild animals and plants are protected rɪˈvɜːs
thereby = as a result, consequently, by that ðeəˈbaɪ

restore = bring back, recover, reestablish rɪˈstɔː
ecosystem = environment, bionetwork, ecology ˈiːkəʊsɪstəm
react = respond, answer, reply rɪˈækt
undertake = accept, embark on, carry on, take on ʌndəˈteɪk
variable = change (n) ˈveəriəbəl
oestrus cycle = the period in the sexual cycle of female mammals, except the higher primates, during which they are in heat—i.e., ready to accept a male and to mate ɪˈstrəs ˈsaɪkl
breeding rate = birth rate ˈbriːdɪŋ reɪt
procedure = method, process, course of action prəˈsiːdʒə
capture = arrest, detain, imprison ˈkæptʃə
bolster = boost, strengthen, improve, enhance, fortify ˈbəʊlstə
dose = the amount of a medicine or a drug that you should take dəʊs
anaesthetic = a substance that makes you unable to feel pain: ænəsˈθetɪk
experience = knowledge, skill, practice, understanding ɪkˈspɪəriəns
handle = control, treat, manage, deal with ˈhændl
transport = move, bring, carry, transfer trænsˈpɔːt
reduction = decrease, drop, fall, decline rɪˈdʌkʃn
conflict = disagreement, dispute, oppose kənˈflɪkt
base = foundation, root, source, origin beɪs
habitat = home, territory, locale, environment ˈhæbɪtæt
destruction = ruin, damage, devastation #construction dɪˈstrʌkʃn
ongoing = continuing, constant, incomplete #finished ɒnˈɡəʊɪŋ
global = worldwide, international #local ˈɡləʊbəl
essential = fundamental, basic, main, principal ɪˈsenʃl
long-term = long-standing, lasting, durable #short-term ˈlɒŋ tɜːm
survival = existence, persistence #death səˈvaɪvəl
numerous = many, various, several #few ˈnjuːmərəs
vital = essential, crucial, critical ˈvaɪtəl
in terms of = with regard to, as to, in connection with. ɪn tɜːmz ɒv

about them to **aid** those still in the wild, as well as educating and **informing** the general population about these animals and their world so that they can **assist** or at least **accept** the need to be more environmentally **conscious**. Without them, the world would be, and would increasingly become, a much poorer place.

inform = tell, notify, update, apprise in'fɔ:m

assist = help, support, aid ə'sɪst

accept = consent, acknowledge #reject #deny ək'sept

conscious = aware, understanding, mindful 'kɒnʃəs

READING PASSAGE 3

Chelsea Rochman, an **ecologist** at the University of California, Davis, has been trying to answer a **dismal** question: Is everything **terrible**, or are things just very, very bad? Rochman is a member of the National Center for Ecological **Analysis** and **Synthesis**'s **marine debris** working group, a **collection** of scientists who study, among other things, the growing problem of marine **debris**, also known as ocean trash. Plenty of studies have **sounded alarm bells** about the **state** of marine debris; in a recent **paper** published in the **journal** *Ecology*, Rochman and her colleagues **set out** to **determine** how many of those **perceived** risks are real.

Often, Rochman says, scientists will end a paper by **speculating** about the **broad**er impacts of what they've found. For example, a study could show that **certain** seabirds eat plastic bags, and **go on to warn** that whole bird populations are **at risk** of **dying out**. 'But the truth was that nobody had yet tested those perceived

ecologist = a scientist who studies ecology, environment i:'kɒlədʒɪst
dismal= miserable, gloomy, depressing 'dɪzməl
terrible= awful, dreadful, appalling #wonderful 'terəbl̩
analysis = examination, study, investigation ə'neɪləsɪs
synthesis = mixture, combination, blend #separation 'sɪnθəˌsɪs
marine= nautical, maritime, sea, ocean mə'ri:n
debris= wreckage, rubbish, trash, waste, fragment 'deɪbrɪ:
collection = group, assembly, gathering kə'leɪkʃn
sound alarm bells = if something rings/sounds alarm bells, it makes you start to worry because it is a sign that there may be a problem 'saʊnd əlɜ:m belz
state = condition, situation, circumstance steɪt
paper = newspaper, article, document 'peɪpə
journal = newsletter, magazine, periodical 'dʒɜ:nəl
set out = start, begin, embark set 'aʊt
determine= verify, establish, uncover, reveal dɪ'tɜ:mɪn
perceive= understand, comprehend, realize, become aware of pə'si:v
speculate= guess, consider, think, contemplate 'spekjuleɪt
broad = wide, large, big, comprehensive brɔ:d
certain = particular, specific, precise 'sɜ:tən
go on to do= to do something after completing something else 'gəʊ 'ɒn tu: du:
warn = caution, inform, alert, tell, notify wɔ:n
at risk = in a dangerous situation ət rɪsk
die out = vanish, perish, become extinct 'daɪ 'aʊt

threats,' Rochman says. 'There wasn't a lot of information.'

Rochman and her colleagues **examined** more than a hundred papers on the impacts of marine debris that were published through 2013. Within each paper, they asked what threats scientists had studied-366 perceived threats in all - and what they'd **actually** found.

In 83 percent of cases, the perceived dangers of ocean **trash** were **proven** true. In the **remaining** cases, the working group found the studies had **weaknesses** in design and content which affected the **validity** of their conclusions - they lacked a control group, for example, or used **faulty statistics**.

Strikingly, Rochman says, only one well-designed study failed to find the effect it was looking for, an **investigation** of **mussels** **ingesting** **microscopic** plastic bits. The plastic moved from the **mussels'** stomachs to their **bloodstreams**, scientists found, and stayed there for weeks - but didn't seem to **stress out** the **shellfish**.

While mussels may be fine eating trash, though, the analysis also gave a clearer picture of the many ways that ocean debris is **bothersome**.

Within the studies they **looked at**, most of the proven threats came from plastic debris, rather than other materials like metal or wood. Most of the dangers also **involved** large pieces of debris animals getting **entangled** in trash, for example, or eating it and **severely injuring** themselves.

But a lot of ocean debris is '**microplastic**', or pieces smaller than five millimeters. These may be **ingredients** used in **cosmetics** and **toiletries**, **fibers shed** by **synthetic** clothing in the wash, or

threat = risk, danger, peril, menace θret

examine = investigate, check, research, explore
ɪg'zæmɪn

actually = really, truly, in fact, in reality 'æktʃuəli

trash = garbage, waste, rubbish, junk træʃ

prove = show, demonstrate, verify pru:v

remaining= the remaining people or things are those that are left when the others have gone, been used, or been dealt with ɪ'meɪnɪŋ

weakness = limitation, drawback, flaw, fault
'wi:knəs

validity= a conclusion, reason...that is based on what is reasonable or sensible və'lɪdɪti

faulty= incorrect, defective, flawed. 'fɔ:lti

statistic= number, figure, measurement, fact
stə'tɪstɪk

strikingly = noticeably, outstandingly, unusually
'straɪkɪŋli

investigation= study, search, examination,
analysis ɪn'vestɪ'geɪʃn

mussel = a small sea animal, with a soft body that can be eaten and a black shell that is divided into two parts 'mʌsl

ingest= swallow, consume, absorb, eat ɪn'dʒest

microscopic = tiny, minute, atomic, mini #gigantic
maɪkrə'skɒpɪk

bloodstream = the blood flowing in your body
'blʌdstri:m

stress out = worry, bother, hassle #relax 'stres
'aʊt

shellfish = an animal that lives in water, has a shell, and can be eaten as food, for example, crabs, lobsters, and oysters 'ʃelfɪʃ

bothersome= annoying, troublesome,
inconvenient 'bɒðəsəm

look at = study, investigate, examine 'lʊk æt

involve= contain, include, consist of ɪn'vɒlv

entangle= (to cause something to become caught in something such as a net or ropes) twist, tangle, trap ɪn'tæŋɡl

severely= harshly, strictly, brutally, #gently sɪ'vɪəli

injure = hurt, harm, wound, damage ɪndʒə

microplastic = extremely small pieces of plastic that are harmful to the environment
'maɪ.krəʊ.plæstɪk

ingredient= component, element, thing, part
ɪn'ɡri:diənt

cosmetic= creams, powders, etc that you use on your face and body in order to look more attractive
kɒz'metɪk

toiletries= things such as soap and toothpaste that are used for cleaning yourself 'toɪlətrɪz

eroded remnants of larger debris. Compared to the number of studies investigating large-scale debris, Rochman's group found little research on the effects of these tiny bits. 'There are a lot of open questions still for microplastic,' Rochman says, though she notes that more papers on the subject have been published since 2013, the **cutoff** point for the group's analysis.

There are also, she adds, a lot of open questions about the ways that ocean debris can lead to sea-**creature** death. Many studies have looked at how plastic affects an individual animal, or that animal's **tissues** or **cells**, rather than whole populations. And in the **lab**, scientists often use higher **concentrations** of plastic than what's really in the ocean. None of that tells us how many birds or fish or sea **turtles** could die from plastic pollution - or how deaths in one species could affect that animal's predators, or **the rest of** the ecosystem.

'We need to be asking more ecologically **relevant** questions,' Rochman says. Usually, scientists don't know exactly how **disasters** such as a **tanker** accidentally **spilling** its whole **cargo** of oil and polluting huge areas of the ocean will affect the environment until after they've happened. 'We don't ask the right questions early enough,' she says. But if ecologists can understand how the slow-moving effect of ocean trash is damaging ecosystems, they might be able to **prevent** things from getting worse.

Asking the right questions can help policy makers, and the public, **figure out** where to focus their **attention**. The problems that look or sound most **dramatic** may not be the best places to start. For example, the name of the 'Great Pacific Garbage **Patch**' - a collection of marine debris in the northern Pacific Ocean - might **conjure up** a **vast floating** trash island. **In reality** though, much of the debris is tiny or below the **surface**; a person could **sail** through the area without seeing any trash at all. A Dutch group called 'The Ocean Cleanup' is currently working on plans to put **mechanical** devices in the Pacific Garbage Patch and similar areas to suck up plastic. But a recent paper used **simulations** to

fiber = a mass of threads used to make rope, cloth, etc 'faɪbə
shed= drop, cast, discard 'dʃed
synthetic = artificial, fake, manmade #natural sɪn'θetɪk
erode = corrode, destroy, wear down ɪ'reʊd
remnant = remainder, leftover, residue 'remnənt
investigate = look into something, explore, probe ɪn'vestɪgeɪt

cutoff = limit, end. 'kəʊtɒf

creature = animal, living thing, being 'kri:tʃə
individual= singular, personal, characteristic ɪndɪ'vɪdʒʊəl
tissue = the material forming animal or plant cells 'tɪʃu:
cell = group, unit, section sel
lab = laboratory, workshop, test center læb
concentration= the amount of a substance in a liquid or in another substance kɒnsən'treɪʃn
turtle = a large reptile with a hard round shell, that lives in the sea 'tɜ:tl
the rest of = what is left after everything or everyone else has gone, been used, dealt with, or mentioned ðə 'rest ɒv

relevant= related, pertinent #unrelated 'reləvənt
disaster = tragedy, catastrophe, calamity dɪ'zɑ:stə
tanker = a vehicle or ship specially built to carry large quantities of gas or liquid, especially oil 'tæŋkə
spill = leak, drop, fall, drip #absorb spɪl
cargo= the goods carried in a ship or plane 'kɑ:gəʊ
prevent= stop, avoid, block, inhibit #permit prɪ'vent

figure out = understand, discover, work out, solve 'fɪɡə 'aʊt
attention = mind, concentration, awareness, consideration ə'tenʃn
dramatic = impressive, extraordinary, remarkable drə'mætɪk
patch = area, space, plot of land pætʃ
conjure st up= to make something appear as a picture in your mind = evoke. 'kʌndʒə snt ʌp
vast = huge, massive, enormous #small vɑ:st
float = to stay or move on the surface of a liquid without sinking fləʊt
in reality = really, actually, in fact ɪn rɪ'ælɪti
surface = outside, shell, façade 'sɜ:fɪs
sail = to travel on or across an area of water in a boat or ship seɪl
mechanical = affecting or involving a machine mɪ'kænɪkl
simulation= model, imitation, virtual reality sɪmjʊ'leɪʃn

show that **strategically** positioning the cleanup devices closer to **shore** would more effectively reduce pollution over the long term.

'I think **clearing up** some of these **misperceptions** is really important,' Rochman says. Among scientists as well as in the media, she says, 'A lot of the images about strandings and entanglement and all of that cause the **perception** that plastic debris is killing everything in the ocean.' **Interrogating** the existing scientific **literature** can help ecologists figure out which problems really need **addressing**, and which ones they'd **be better off** - like the mussels - **absorbing** and ignoring.

strategically= deliberately, intentionally, purposefully *stre'ti:dʒɪkli*
shore = coast, seashore, coastline *ʃɔ:*

clear up = explain, elaborate, solve. *'kliə ʌp*
misperception= misunderstanding, confusion *mɪspə'sepʃən*

perception = view, opinion, assessment *pə'sepʃən*
interrogate = question, interview, probe= to ask someone a lot of questions for a long time in order to get information, sometimes using threats *ɪn'terəgeɪt*

literature= all the books, articles, etc on a particular subject *'lɪtrətʃə*

address = tackle, focus, deal with **ignore** *ə'dres*

be better off = to be in a better situation, if or after something happens *bɪ 'betər ɒf*

absorb = if something absorbs light, heat, energy, or noise, it takes it in. *əb'zɔ:b*
